### General Description

The HT9020B call progress tone detector is a telecom peripheral for Auto-dialing system use.

Switched capacitors technology is implemented into the chip to get good performance characteristics of band pass filter in the range of 305 to 640Hz call progress tone which is dual tone multi-frequency signal.

When it detected CPT signal then it generates relative envelopes for external microcontroller decision to finish different kinds of CPT signal detection such as dial tone, busy tone, ring-back tone and reorder tone.

### Pin Assignment

**Pin Description**

Pin Name	I/O	Internal Connection	Description
ENV	O	CMOS OUT	While an input signal is within specification, this pin will output the envelope relative to the input signal with a typical 40ms timing delay.
VREF	O	CMOS OUT	1/2 V <sub>DD</sub> reference voltage output pin When EN=V <sub>DD</sub> , the device will be turned off and VREF disabled.
SIN	I	CMOS IN	AC coupled analog signal input pin
VSS	—	—	Negative power supply, ground
VDD	—	—	Positive power supply
$\overline{\text{EN}}$	I	CMOS IN	$\overline{\text{EN}}=V_{\text{SS}}$ ; Normal operation mode $\overline{\text{EN}}=V_{\text{DD}}$ ; Device disabled.
X1	I	OSCILLATOR	The system oscillator consists of an inverter, a bias resistor and the necessary on-chip load capacitor. Connect a standard 32.768kHz crystal or ceramic resonator.
X2	O	OSCILLATOR	X1 and X2 terminals implement the oscillator function. The oscillator is turned off in the standby mode.

**Absolute Maximum Ratings**

Supply Voltage.....V <sub>SS</sub> -0.3V to V <sub>DD</sub> +6V	Storage Temperature.....-55°C to 150°C
Input Voltage ..... V <sub>SS</sub> -0.3V to V <sub>DD</sub> +0.3V	Operating Temperature .....-20°C to 75°C

Note: These are stress ratings only. Stresses exceeding the range specified under "Absolute Maximum Ratings" may cause substantial damage to the device. Functional operation of this device at other conditions beyond those listed in the specification is not implied and prolonged exposure to extreme conditions may affect device reliability.
