MITSUBISHI MICROCOMPUTERS
M37516F8HP

SINGLE-CHIP 8-BIT CMOS MICROCOMPUTER

DESCRIPTION

The M37516F8HP is the 8-bit microcomputer based on the 740 family core technology.

The M37516F8HP is designed for household products and office automation equipment and includes serial I/O functions, 8-bit timer, A-D converter, and I²C-BUS interface.

FEATURES

- Basic machine-language instructions 71
- Minimum instruction execution time 0.5 μs
 (at 8 MHz oscillation frequency)
- Memory size
 Flash memory 32 Kbytes
 RAM 1 Kbytes
- Programmable input/output ports 40
- Interrupts 17 sources, 16 vectors
- Timers 8-bit X 4
- Serial I/O1 8-bit X 1 (UART or Clock-synchronized)
- Serial I/O2 8-bit X 1 (Clock-synchronized)
- Multi-master I²C-BUS interface (option) 1 channel
- PWM 8-bit X 1
- A-D converter 10-bit X 8 channels
- Watchdog timer 16-bit X 1

- Clock generating circuit Built-in 2 circuits
 (connect to external ceramic resonator or quartz-crystal oscillator)
- Power source voltage
 In high-speed mode 4.0 to 5.5 V
 (at 8 MHz oscillation frequency)
 In high-speed mode 2.7 to 5.5 V
 (at 4 MHz oscillation frequency)
 In middle-speed mode 2.7 to 5.5 V
 (at 8 MHz oscillation frequency)
 In low-speed mode 2.7 to 5.5 V
 (at 32 kHz oscillation frequency)
- Power dissipation
 In high-speed mode 34 mW
 (at 8 MHz oscillation frequency, at 5 V power source voltage)
 In low-speed mode T.B.D.
 (at 32 kHz oscillation frequency, at 3 V power source voltage)
- Operating temperature range -20 to 85°C

APPLICATION

Office automation equipment, FA equipment, Household products, Consumer electronics, etc.

PIN CONFIGURATION (TOP VIEW)

Package type : 48P6Q-A

 change.

FUNCTIONAL BLOCK

Fig. 2 Functional block diagram

PIN DESCRIPTION

Table 1 Pin description

Pin	Name	Functions	
			Function except a port function
VCC, VSS	Power source	•Apply voltage of 2.7 V – 5.5 V to Vcc, and 0 V to Vss.	
CNVSS	CNVSS input	•This pin controls the operation mode of the chip. •Normally connected to VSS.	
RESET	Reset input	•Reset input pin for active “L.”	
XIN	Clock input	•Input and output pins for the clock generating circuit. •Connect a ceramic resonator or quartz-crystal oscillator between the XIN and XOUT pins to set the oscillation frequency.	
XOUT	Clock output	•When an external clock is used, connect the clock source to the XIN pin and leave the XOUT pin open.	
P00/SIN2 P01/SOUT2 P02/SCLK2 P03/SRDY2 P04–P07	I/O port P0	•8-bit CMOS I/O port. •I/O direction register allows each pin to be individually programmed as either input or output. •CMOS compatible input level. •CMOS 3-state output structure.	• Serial I/O2 function pin
P10–P17	I/O port P1	•P10 to P17 (8 bits) are enabled to output large current for LED drive.	
P20/XCOU P21/XCIN P22/SDA1 P23/SCL1 P24/SDA2/RxD P25/SCL2/TxD P26/SCLK P27/CNTR0/ SRDY1	I/O port P2	•8-bit CMOS I/O port. •I/O direction register allows each pin to be individually programmed as either input or output. •CMOS compatible input level. •P22 to P25 can be switched between CMOS compatible input level or SMBUS input level in the I ² C-BUS interface function. •P20, P21, P24 to P27: CMOS3-state output structure. •P24, P25: N-channel open-drain structure in the I ² C-BUS interface function. •P22, P23: N-channel open-drain structure.	• Sub-clock generating circuit I/O pins (connect a resonator) • I ² C-BUS interface function pins • I ² C-BUS interface function pin/ Serial I/O1 function pins • Serial I/O1 function pin • Serial I/O1 function pin/ Timer X function pin
P30/AN0– P37/AN7	I/O port P3	•8-bit CMOS I/O port with the same function as port P0. •CMOS compatible input level. •CMOS 3-state output structure.	• A-D converter input pin
P40/CNTR1 P41/INT0 P42/INT1 P43/INT2/SCMP2 P44/INT3/PWM P45–P47	I/O port P4	•8-bit CMOS I/O port with the same function as port P0. •CMOS compatible input level. •CMOS 3-state output structure.	• Timer Y function pin • Interrupt input pins • Interrupt input pin/SCMP2 output pin • Interrupt input pin/PWM output pin

FUNCTIONAL DESCRIPTION
CENTRAL PROCESSING UNIT (CPU)

The M37516F8HP uses the standard 740 Family instruction set. Refer to the table of 740 Family addressing modes and machine instructions or the 740 Family Software Manual for details on the instruction set.

Machine-resident 740 Family instructions are as follows:

- The FST and SLW instructions cannot be used.
- The STP, WIT, MUL, and DIV instructions can be used.

[CPU Mode Register (CPUM)] 003B16

The CPU mode register contains the stack page selection bit, etc. The CPU mode register is allocated at address 003B16.

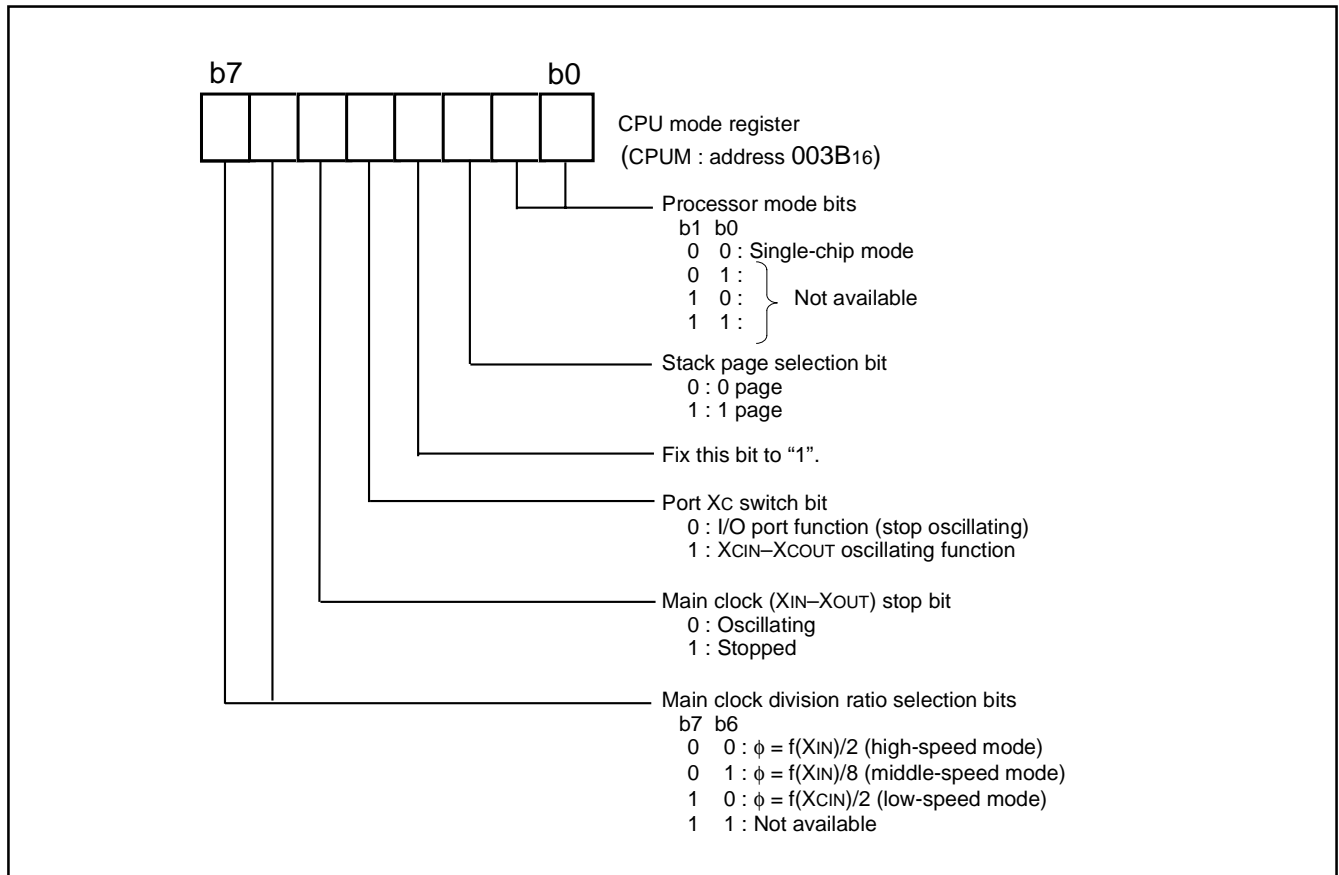

Fig. 3 Structure of CPU mode register

MEMORY

Special Function Register (SFR) Area

The Special Function Register area in the zero page contains control registers such as I/O ports and timers.

RAM

RAM is used for data storage and for stack area of subroutine calls and interrupts.

Flash Memory

The first 128 bytes and the last 2 bytes of flash memory are reserved for device testing and the rest is user area for storing programs.

Interrupt Vector Area

The interrupt vector area contains reset and interrupt vectors.

Zero Page

Access to this area with only 2 bytes is possible in the zero page addressing mode.

Special Page

Access to this area with only 2 bytes is possible in the special page addressing mode.

		0FFD ₁₆	Reserved *
		0FFE ₁₆	Flash memory control register (FCON)
		0FFF ₁₆	Reserved *

* Reserved : Do not write any data to the reserved area.

Fig. 5 Memory map of special function register (SFR)

I/O PORTS

The I/O ports have direction registers which determine the input/output direction of each individual pin. Each bit in a direction register corresponds to one pin, and each pin can be set to be input port or output port.

When "0" is written to the bit corresponding to a pin, that pin becomes an input pin. When "1" is written to that bit, that pin becomes an output pin.

If data is read from a pin which is set to output, the value of the port output latch is read, not the value of the pin itself. Pins set to input are floating. If a pin set to input is written to, only the port output latch is written to and the pin remains floating.

Table 2 I/O port function

Pin	Name	Input/Output	I/O Structure	Non-Port Function	Related SFRs	Ref.No.
P00/SIN2 P01/SOUT2 P02/SCLK2 P03/SRDY2	Port P0	Input/output, individual bits	CMOS compatible input level CMOS 3-state output	Serial I/O2 function I/O	Serial I/O2 control register	(1)

MITSUBISHI ELECTRIC CORPORATION
 HEAD OFFICE: 2-2-3, MARUNOUCHI, CHIYODA-KU, TOKYO 100-8310, JAPAN

Keep safety first in your circuit designs!

- Mitsubishi Electric Corporation puts the maximum effort into making semiconductor products better and more reliable, but there is always the possibility that trouble may occur with them. Trouble with semiconductors may lead to personal injury, fire or property damage. Remember to give due consideration to safety when making your circuit designs, with appropriate measures such as (i) placement of substitutive, auxiliary circuits, (ii) use of non-flammable material or (iii) prevention against any malfunction or mishap.

Notes regarding these materials

- These materials are intended as a reference to assist our customers in the selection of the Mitsubishi semiconductor product best suited to the customer's application; they do not convey any license under any intellectual property rights, or any other rights, belonging to Mitsubishi Electric Corporation or a third party.
- Mitsubishi Electric Corporation assumes no responsibility for any damage, or infringement of any third-party's rights, originating in the use of any product data, diagrams, charts, programs, algorithms, or circuit application examples contained in these materials.
- All information contained in these materials, including product data, diagrams, charts, programs and algorithms represents information on products at the time of publication of these materials, and are subject to change by Mitsubishi Electric Corporation without notice due to product improvements or other reasons. It is therefore recommended that customers contact Mitsubishi Electric Corporation or an authorized Mitsubishi Semiconductor product distributor for the latest product information before purchasing a product listed herein. The information described here may contain technical inaccuracies or typographical errors. Mitsubishi Electric Corporation assumes no responsibility for any damage, liability, or other loss rising from these inaccuracies or errors. Please also pay attention to information published by Mitsubishi Electric Corporation by various means, including the Mitsubishi Semiconductor home page (<http://www.mitsubishichips.com>).
- When using any or all of the information contained in these materials, including product data, diagrams, charts, programs, and algorithms, please be sure to evaluate all information as a total system before making a final decision on the applicability of the information and products. Mitsubishi Electric Corporation assumes no responsibility for any damage, liability or other loss resulting from the information contained herein.
- Mitsubishi Electric Corporation semiconductors are not designed or manufactured for use in a device or system that is used under circumstances in which human life is potentially at stake. Please contact Mitsubishi Electric Corporation or an authorized Mitsubishi Semiconductor product distributor when considering the use of a product contained herein for any specific purposes, such as apparatus or systems for transportation, vehicular, medical, aerospace, nuclear, or undersea repeater use.
- The prior written approval of Mitsubishi Electric Corporation is necessary to reprint or reproduce in whole or in part these materials.
- If these products or technologies are subject to the Japanese export control restrictions, they must be exported under a license from the Japanese government and cannot be imported into a country other than the approved destination. Any diversion or reexport contrary to the export control laws and regulations of Japan and/or the country of destination is prohibited.
- Please contact Mitsubishi Electric Corporation or an authorized Mitsubishi Semiconductor product distributor for further details on these materials or the products contained therein.
