TOSHIBA CMOS DIGITAL INTEGRATED CIRCUIT SILICON MONOLITHIC

TC74HC148AP, TC74HC148AF

8 – TO – 3 LINE PRIORITY ENCODER

The TC74HC148A is a high speed CMOS 8 - to - 3 LINE ENCODER fabricated with silicon gate C^2MOS technology.
It achieves the high speed operation similar to equivalent LSTTL while maintaining the CMOS low power dissipation.
All data inputs and outputs of these encoders are active at the low logic level.
The encoder detects a low level of the highest order among eight input singals and outputs the corresponding signal position in binaly code.
Enable Input EI and Enable Output EO are used to easily cascade without using external circuits.
All inputs are equipped with protection circuits against static discharge or transient excess voltage.
