

# MOS FIELD EFFECT TRANSISTOR $\mu$ PA622TT

## N-CHANNEL MOS FIELD EFFECT TRANSISTOR FOR SWITCHING

#### **DESCRIPTION**

The  $\mu PA622TT$  is a switching device which can be driven directly by a 4.0 V power source.

This device features a low on-state resistance and excellent switching characteristics, and is suitable for applications such as power switch of portable machine and so on.

#### **FEATURES**

- 4.0 V drive available
- · Low on-state resistance

 $R_{DS(on)1} = 82 \text{ m}\Omega \text{ MAX.} \text{ (Vgs} = 10 \text{ V, I}_D = 1.5 \text{ A})$ 

 $R_{DS(on)2} = 120 \text{ m}\Omega \text{ MAX.}$  (Vgs = 4.5 V, ID = 1.0 A)

 $R_{DS(on)3} = 139 \text{ m}\Omega \text{ MAX}. \text{ (VGS = 4.0 V, ID = 1.0 A)}$ 

#### **★ ORDERING INFORMATION**

PART NUMBER	PACKAGE
μPA622TT-E1-A	6 pin WSOF (1620)
μPA622TT-E2-A	

**Remark** "-A" indicates Pb-free (This product does not contain Pb in external electrode and other parts.).

"-E1" or "-E2" indicates the unit orientation.

(8 mm embossed carrier tape, 3000 pcs/reel)

Marking: WC

#### **EQUIVALENT CIRCUIT**

**Remark** The diode connected between the gate and source of the transistor serves as a protector against ESD. When this device actually used, an additional protection circuit is externally required if a voltage exceeding the rated voltage may be applied to this device.

  written consent of NEC Electronics. NEC Electronics assumes no responsibility for any errors that may
  appear in this document.
- NEC Electronics does not assume any liability for infringement of patents, copyrights or other intellectual property rights of third parties by or arising from the use of NEC Electronics products listed in this document or any other liability arising from the use of such products. No license, express, implied or otherwise, is granted under any patents, copyrights or other intellectual property rights of NEC Electronics or others.
- Descriptions of circuits, software and other related information in this document are provided for illustrative
  purposes in semiconductor product operation and application examples. The incorporation of these
  circuits, software and information in the design of a customer's equipment shall be done under the full
  responsibility of the customer. NEC Electronics assumes no responsibility for any losses incurred by
  customers or third parties arising from the use of these circuits, software and information.
- While NEC Electronics endeavors to enhance the quality, reliability and safety of NEC Electronics products, customers agree and acknowledge that the possibility of defects thereof cannot be eliminated entirely. To minimize risks of damage to property or injury (including death) to persons arising from defects in NEC Electronics products, customers must incorporate sufficient safety measures in their design, such as redundancy, fire-containment and anti-failure features.
- NEC Electronics products are classified into the following three quality grades: "Standard", "Special" and "Specific".

The "Specific" quality grade applies only to NEC Electronics products developed based on a customer-designated "quality assurance program" for a specific application. The recommended applications of an NEC Electronics product depend on its quality grade, as indicated below. Customers must check the quality grade of each NEC Electronics product before using it in a particular application.

- "Standard": Computers, office equipment, communications equipment, test and measurement equipment, audio and visual equipment, home electronic appliances, machine tools, personal electronic equipment and industrial robots.
- "Special": Transportation equipment (automobiles, trains, ships, etc.), traffic control systems, anti-disaster systems, anti-crime systems, safety equipment and medical equipment (not specifically designed for life support).
- "Specific": Aircraft, aerospace equipment, submersible repeaters, nuclear reactor control systems, life support systems and medical equipment for life support, etc.

The quality grade of NEC Electronics products is "Standard" unless otherwise expressly specified in NEC Electronics data sheets or data books, etc. If customers wish to use NEC Electronics products in applications not intended by NEC Electronics, they must contact an NEC Electronics sales representative in advance to determine NEC Electronics' willingness to support a given application.

#### (Note

- (1) "NEC Electronics" as used in this statement means NEC Electronics Corporation and also includes its majority-owned subsidiaries.
- (2) "NEC Electronics products" means any product developed or manufactured by or for NEC Electronics (as defined above).
