NTE56049 & NTE56050 TRIAC, 4A Low Logic Level

Description:

The NTE56049 and NTE56050 are glass passivated, Low Logic Level TRIACs in a TO220 type package designed for use in general purpose bidirectional switching and phase control applications. These devices are intended to be interfaced directly to microcontrollers, logic integrated circuits, and other low power gate trigger circuits.
