DATA SHEET

Part No.	AN13301A
Package Code No.	QFP048-P-1212C

SEMICONDUCTOR COMPANY
MATSUSHITA ELECTRIC INDUSTRIAL CO., LTD.

Contents

AN13301A

Silicon Monolithic Bi - CMOS IC

■ Function

- Video signal output interface for D - terminal

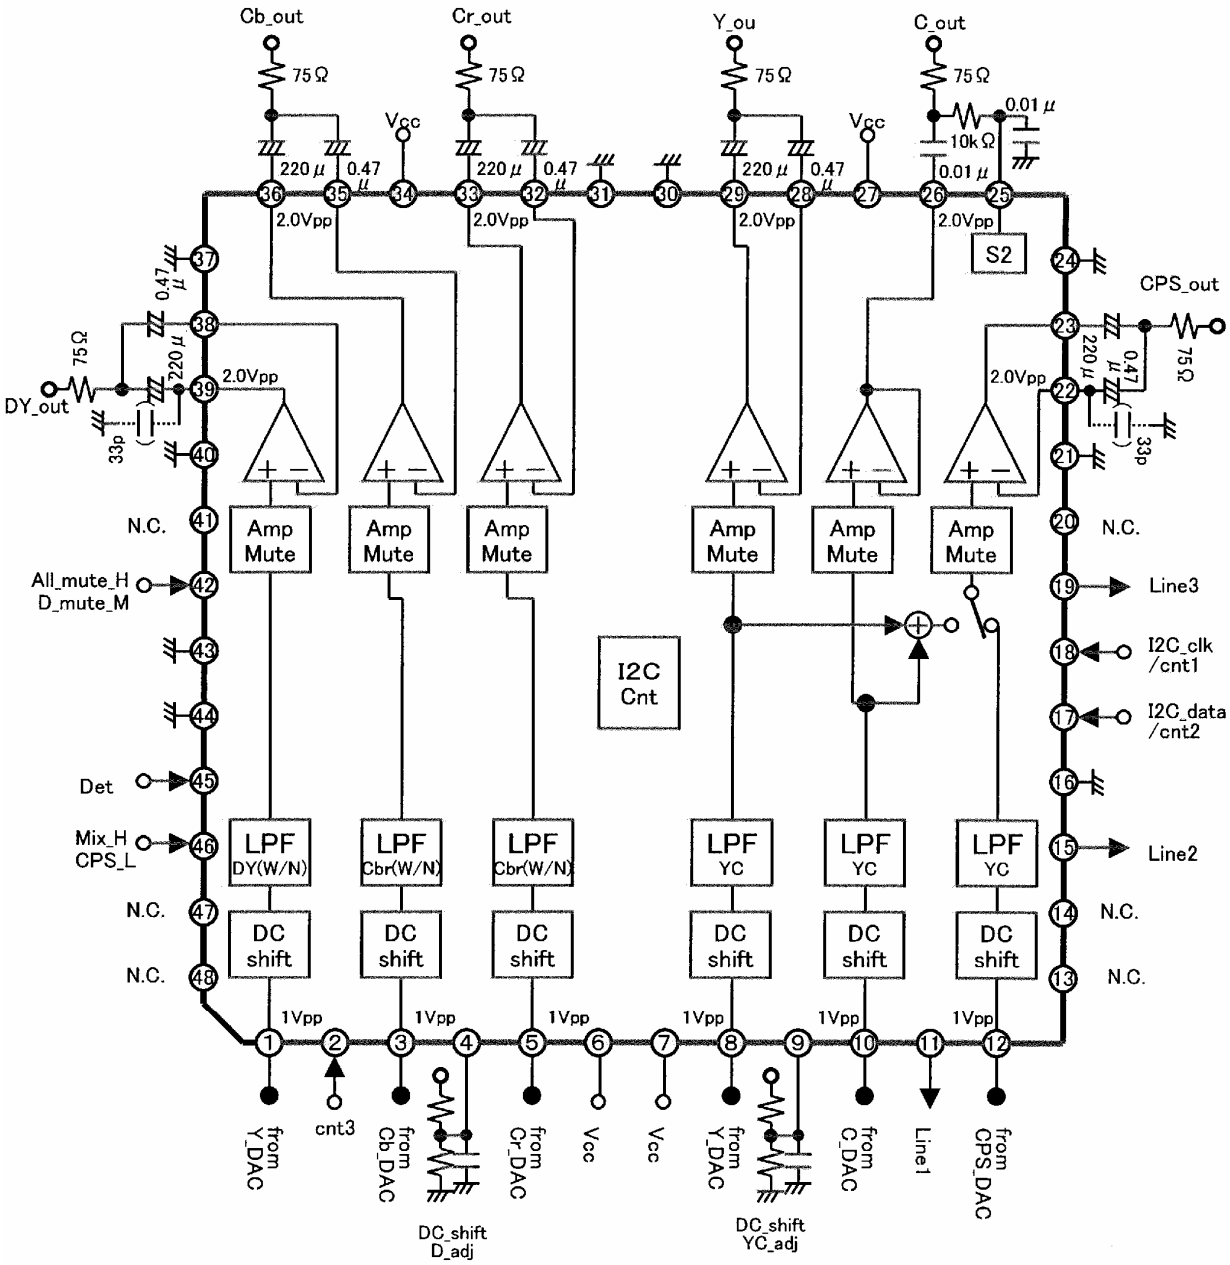
■ Applications

- STB

■ Package

- 4Directions - 48Pin Plastic Package (QFP Type)

■ Block Diagram



■Pin Descriptions

Pin No.	Function	Impedance	Pin No.	Function	Impedance
1	DY input	Hi - Z	25	S2 output	Lo - Z
2	ctrl 3 input	Hi - Z	26	AC output	E. F.
3	Cb input	Hi - Z	27	V_{CC}	—
4	DC shift	Hi - Z	28	AY Sag compensation	30 kΩ
5	Cr input	Hi-Z	29	AY output	E. F.
6	V_{CC}	—	30	GND	—
7	V_{CC}	—	31	GND	—
8	AY input	Hi - Z	32	Cr Sag compensation	30 kΩ
9	DC shift	Hi - Z	33	Cr output	E. F.
10	AC input	Hi - Z	34	V_{CC}	—
11	Line 1 output	Lo - Z	35	Cb Sag compensation	30 kΩ
12	CPS input	Hi - Z	36	Cb output	E. F.
13	N. C.	—	37	GND	—
14	N. C.	—	38	DY sag compensation	30 kΩ
15	Line 2 output	Lo - Z	39	DY output	E. F.
16	GND	—	40	GND	—
17	I^2C data / ctrl 2 input	Hi - Z	41	N. C.	—
18	I^2C clock / ctrl 2 input	Hi - Z	42	Mute input	Hi - Z
19	Line 3 output	Lo - Z	43	(GND)	—
20	N. C.	—	44	GND	—
21	GND	—	45	Det input	Hi - Z
22	CPS Sag compensation	30 kΩ	46	Mix / CPS input	Hi - Z
23	CPS output	E. F.	47	N. C.	—
24	GND	—	48	N. C.	—

■ Absolute Maximum Ratings

No.	Parameter	Symbol	Rating		Unit	Note
1	Storage temperature	T_{stg}	–55 to +125		°C	*1
2	Operating ambient temperature	T_{opr}	–20 to +70		°C	*1
3	Operating ambient atmospheric pressure	P_{opr}	$1.013 \times 10^5 \pm 0.61 \times 10^5$		Pa	
4	Operating constant gravity	G_{opr}	9 810		m/s^2	
5	Operating shock	S_{opr}	4 900		m/s^2	
6	Supply voltage	V_{CC}	V_{CC}	5.5	V	
7	Supply current	I_{CC}	I_{CC}	—	mA	
8	Power dissipation	P_D	468		mW	*2

Note) *1 : Expect for the operating ambient temperature and storage temperature , all ratings are for Ta = 25°C.

Note) *2 : The above power dissipation shows the package dissipation of the IC without heat sink at TA = 70℃
Refer to the Pd - Ta characteristic curve in page 21.

■ Operating Supply Voltage Range

Operating supply voltage range	V_{CC}	4.75 V to 5.25 V

Request for your special attention and precautions in using the technical information and semiconductors described in this material

(1) An export permit needs to be obtained from the competent authorities of the Japanese Government if any of the products or technical information described in this material and controlled under the "Foreign Exchange and Foreign Trade Law" is to be exported or taken out of Japan.

(2) The technical information described in this material is limited to showing representative characteristics and applied circuits examples of the products. It neither warrants non-infringement of intellectual property right or any other rights owned by our company or a third party, nor grants any license.

(3) We are not liable for the infringement of rights owned by a third party arising out of the use of the technical information as described in this material.

(4) The products described in this material are intended to be used for standard applications or general electronic equipment (such as office equipment, communications equipment, measuring instruments and household appliances).
Consult our sales staff in advance for information on the following applications:
- Special applications (such as for airplanes, aerospace, automobiles, traffic control equipment, combustion equipment, life support systems and safety devices) in which exceptional quality and reliability are required, or if the failure or malfunction of the products may directly jeopardize life or harm the human body.
- Any applications other than the standard applications intended.

(5) The products and product specifications described in this material are subject to change without notice for modification and/or improvement. At the final stage of your design, purchasing, or use of the products, therefore, ask for the most up-to-date Product Standards in advance to make sure that the latest specifications satisfy your requirements.

(6) When designing your equipment, comply with the guaranteed values, in particular those of maximum rating, the range of operating power supply voltage, and heat radiation characteristics. Otherwise, we will not be liable for any defect which may arise later in your equipment.
Even when the products are used within the guaranteed values, take into the consideration of incidence of break down and failure mode, possible to occur to semiconductor products. Measures on the systems such as redundant design, arresting the spread of fire or preventing glitch are recommended in order to prevent physical injury, fire, social damages, for example, by using the products.

(7) When using products for which damp-proof packing is required, observe the conditions (including shelf life and amount of time let standing of unsealed items) agreed upon when specification sheets are individually exchanged.
