ADC's Custom Multi Element Silicon Photodiodes

Advanced Detector Corporation has been involved in the design and manufacture of custom silicon photodiodes for the past 20 years. Our capabilities include full packaging and assembly facilities as well as our ability to provide a photodetector virtually any size, shape and electrical specification. The following product offerings are available as representative samples of our custom capability.

Multi Element Arrays

Silicon multielement linear and matrix arrays are available with excellent blue response and element matching. These devices are offered in chip form as well as mounted in a dual in line package or ceramic substrate housing.

Military Applications

Advanced Detector Corporation has extensive experience in supplying detectors for military and aerospace applications. The ADC Quality Assurance Program has been developed to meet the requirements of MIL Q-9858A. ADC enjoys a reputation in the military/aerospace community as a high quality and reliable supplier. A copy of ASEC 91-6064 Quality Assurance Program Document which delineates the quality assurance policies implemented on all products to assure compliance with specifications is available upon request.

Applications

- Construction Laser Alignment Systems
- Facsimile Instrumentation
- Photocopiers
- Optical Encoders
- Machine Tool Alignment
- X-ray Imaging
