## SKiiP 432GB120-2D

### 2-pack - integrated intelligent Power System

**Power section** 

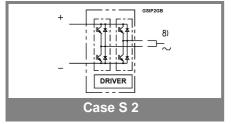

SKiiP 432GB120-2D

#### **Features**

- · SKiiP technology inside
- CAL diode technology
- Integrated current sensor
- Integrated temperature sensor
- Integrated heat sink
- IEC 60721-3-3 (humidity) class 3K3/IE32 (SKiiP® 2 System)
- IEC 60068-1 (climate) 40/125/56
- 1) with assembly of suitable MKP capacitor per terminal (SEMIKRON type is recommended)
- 8) AC connection busbars must be connected by the user; copper busbars available on request

# 2-pack - integrated intelligent Power System

2-pack integrated gate driver

SKiiP 432GB120-2D

#### **Gate driver features**

- · CMOS compatible inputs
- Wide range power supply
- Integrated circuitry to sense phase current, heat sink temperature and DC-bus voltage (option)
- · Short circuit protection
- · Over current protection
- Over voltage protection (option)
- Power supply protected against under voltage
- · Interlock of top/bottom switch
- Isolation by transformers
- Fibre optic interface (option for GB-types only)
- IEC 60068-1 (climate) 25/85/56

| Characteristics (T <sub>a</sub> |  |   |  |      |       |
|---------------------------------|--|---|--|------|-------|
| Symbol                          | Conditions   | min.  | typ.   | max. | Units |
| V <sub>S1</sub>                 | supply voltage stabilized                                | 14,4  | 15   | 15,6 | V     |
| $V_{S2}$                        | supply voltage non stabilized                            | 20  | 24   | 30   | V     |
| I <sub>S1</sub>                 | V <sub>S1</sub> = 15 V                                   | 210+320   | 210+320*f/f <sub>max</sub> +1,2*(I <sub>AC</sub> /A) |      |       |
| I <sub>S2</sub>                 | V <sub>S2</sub> = 24 V                                   | 160+220*f/f <sub>max</sub> +0,85*(I <sub>AC</sub> /A) |  |      | mA    |
| V <sub>iT+</sub>                | input threshold voltage (High)                           |   |  | 12,3 | V     |
| $V_{iT-}$                       | input threshold voltage (Low)                            | 4,6   |  |      | V     |
| R <sub>IN</sub>                 | input resistance   |   | 10   |      | kΩ    |
| t <sub>d(on)IO</sub>            | input-output turn-on propagation time                    |   |  | 1,5  | μs    |
| t <sub>d(off)IO</sub>           | input-output turn-off propagation time                   |   |  | 1,4  | μs    |
| t <sub>pERRRESET</sub>          | error memory reset time                                  | 9   |  |      | μs    |
| $t_TD$                          | top / bottom switch : interlock time                     |   | 3,3  |      | μs    |
| I <sub>analogOUT</sub>          | 8 V corresponds to max. current of 15 V supply voltage   |   | 400  |      | Α     |
| I <sub>Vs1outmax</sub>          | (available when supplied with 24 V)                      |   |  | 50   | mA    |
| I <sub>A0max</sub>              | output current at pin 12/14                              |   |  | 5    | mA    |
| V <sub>0I</sub>                 | logic low output voltage                                 |   |  | 0,6  | V     |
| V <sub>0H</sub>                 | logic high output voltage                                |   |  | 30   | V     |
| I <sub>TRIPSC</sub>             | over current trip level (I <sub>analog OUT</sub> = 10 V) |   | 500  |      | Α     |
| I <sub>TRIPLG</sub>             | ground fault protection                                  |   |  |      | Α     |
| $T_tp$                          | over temperature protection                              | 110   |  | 120  | °C    |
| U <sub>DCTRIP</sub>             | trip level of U <sub>DC</sub> -protection                | 900   |  |      | V     |
|                                 | ( U <sub>analog OUT</sub> = 9 V); (option)               |   |  |      |       |
