

♦ STRUCTURE Silicon Monolithic Integrated Circuit

♦ PRODUCT SPI BUS 64Kbit (8,192 × 8bit) EEPROM

♦ PART NUMBER BR25L640-W Series

PART NUMBER	PACKAGE
BR25L640F-W	SOP8
BR25L640FJ-W	SOP-J8

♦ FEATURES Serial Peripheral Interface

Single power supply (1.8V~5.5V) 1,000,000 erase/write cycles endurance

♦ ABSOLUTE MAXIMUM RATING (Ta=25°C)

Parameter	Symbol Rating		Unit
Supply Voltage	Vcc −0.3~6.5		٧
Down Dissipation	Pd	450 (BR25L640F-W) *1	\A/
Power Dissipation	Pu	450 (BR25L640FJ-W) *2	mW
Storage Temperature	Tstg −65~125		°C
Operating Temperature	Topr	r -40~85	
Terminal Voltage	-	0.3∼Vcc+0.3	

^{*} Degradation is done at 4.5mW/°C (*1,*2) for operation above 25°C

♦ RECOMMENDED OPERATING CONDITION

Parameter	Symbol	Rating	Unit
Supply Voltage	Vcc	1.8~5.5	٧
Input Voltage	VIN	0~Vcc	٧

Status of this document

The Japanese version of this document is the fomal specification.

A customer may use this translation version only for a reference to help reading the formal version.

If there are any differences in translation version of this document, formal version takes priority.

♦ MEMORY CELL CHARACTERISTICS(Ta=25°C, Vcc=1.8~5.5V)

♦NOTES FOR POWER SUPPLY

In order to prevent an inadvertent write, the device has the feature of P.O.R.

After the power is on, the device is in the write disable mode. P.O.R. works only during power up. The noise may force the device write enable mode with $\overline{\text{CS}}$ ="H"during power ON/OFF. In the case of power up, keep the following conditions to ensure to make the function of P.O.R.

♦ RECOMMENDED CONDITIONS OF tR, tOFF, Vbot				
tR	tOFF	Vbot		
Below 10ms	Above 10ms	Below 0.3V		
Below 100ms	Above 10ms	Below 0.2V		

Please keep CS "H" during power ON/OFF.

The device is an active state during \overline{CS} is low. The extraordinary function or data collaption may occur because of noise etc., if power-up is done with \overline{CS} "L". In order to prevent above errors from happening, keep \overline{CS} "H" (=Vcc) during power ON. (The device does not receive any command during \overline{CS} is high.)

It may continue at low Vcc by capacitance of Vcc line during power off.

Please keep CS "H" during power off because of the device may make malfunction and inadvertent write.

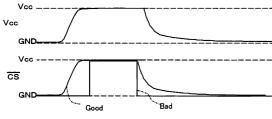

Fig.3 CS TIMING DURING POWER ON/OFF

(Good example)

CS follows Vcc. (CS is pull up to Vcc)

(Bad example)

CS is low during power ON/OFF.

Please take more than 10ms between power ON and power OFF, or the internal circuit is not always reset.

CAUTIONS ON USE

(1) Absolute maximum ratings

If the absolute maximum ratings such as impressed voltage and operating temperature range and so forth are exceeded, LSI may be destructed. Do not impress voltage and temperature exceeding the absolute maximum ratings. In the case of fear exceeding the absolute maximum ratings, take physical safety countermeasures such as fuses, and see to it that conditions exceeding the absolute maximum ratings should not be impressed to LSI.

(2) GND electric potential

Set the voltage of GND terminal lowest at any action condition. Make sure that each terminal voltages is lower than that of GND terminal.

(3) Heat design

In consideration of permissible dissipation in actual use condition, carry out heat design with sufficient margin.

(4) Terminal to terminal shortcircuit and wrong packaging

When to package LSI onto a board, pay sufficient attention to LSI direction and displacement. Wrong packaging may destruct LSI. And in the case of shortcircuit between LSI terminals and terminals and power source, terminal and GND owing to foreign matter, LSI may be destructed.

(5) Strong electromagnetic field

Use in a strong electromagnetic field may cause malfunction, therefore, evaluated design sufficiently.

Notes

- No technical content pages of this document may be reproduced in any form or transmitted by any
 means without prior permission of ROHM CO.,LTD.
- The contents described herein are subject to change without notice. The specifications for the
 product described in this document are for reference only. Upon actual use, therefore, please request
 that specifications to be separately delivered.
- Application circuit diagrams and circuit constants contained herein are shown as examples of standard
 use and operation. Please pay careful attention to the peripheral conditions when designing circuits
 and deciding upon circuit constants in the set.
- Any data, including, but not limited to application circuit diagrams information, described herein are intended only as illustrations of such devices and not as the specifications for such devices. ROHM CO.,LTD. disclaims any warranty that any use of such devices shall be free from infringement of any third party's intellectual property rights or other proprietary rights, and further, assumes no liability of whatsoever nature in the event of any such infringement, or arising from or connected with or related to the use of such devices.
- Upon the sale of any such devices, other than for buyer's right to use such devices itself, resell or
 otherwise dispose of the same, no express or implied right or license to practice or commercially
 exploit any intellectual property rights or other proprietary rights owned or controlled by
- ROHM CO., LTD. is granted to any such buyer.
- Products listed in this document are no antiradiation design.

The products listed in this document are designed to be used with ordinary electronic equipment or devices (such as audio visual equipment, office-automation equipment, communications devices, electrical appliances and electronic toys).

Should you intend to use these products with equipment or devices which require an extremely high level of reliability and the malfunction of with would directly endanger human life (such as medical instruments, transportation equipment, aerospace machinery, nuclear-reactor controllers, fuel controllers and other safety devices), please be sure to consult with our sales representative in advance.

About Export Control Order in Japan

Products described herein are the objects of controlled goods in Annex 1 (Item 16) of Export Trade Control Order in Japan.

In case of export from Japan, please confirm if it applies to "objective" criteria or an "informed" (by MITI clause) on the basis of "catch all controls for Non-Proliferation of Weapons of Mass Destruction.

Thank you for your accessing to ROHM product informations.
