## Fast Recovery Diode

# 5SDF 04F6004

Doc. No. 5SYA1150-02 Sep. 01

- Patented free-floating technology
- Industry standard housing
- Cosmic radiation withstand rating
- Low on-state and switching losses
- Optimized to use in snubberless operation

### Blocking

|              |   |              |   |  |
|--------------|---|--------------|---|--|
| $V_{RRM}$    | Repetitive peak reverse voltage               | 5500 V       | Half sine wave, $t_p = 10$ ms, $f = 50$ Hz  |  |
| $I_{RRM}$    | Repetitive peak reverse current               | $\leq 20$ mA | $V_R = V_{RRM}$ , $T_J = 115^\circ\text{C}$ |  |
| $V_{DClink}$ | Permanent DC voltage for 100 FIT failure rate | 3300 V       | 100% Duty                                   | Ambient cosmic radiation at sea level in open air. |
| $V_{DClink}$ | Permanent DC voltage for 100 FIT failure rate | 3900 V       | 5% Duty                                     |  |

### Mechanical data

|       |   |        |                      |  |
|-------|---|--------|----------------------|--|
| $F_m$ | Mounting force                                      | min.   | 18 kN                |  |
|       |   | max.   | 22 kN                |  |
| a     | Acceleration:<br>Device unclamped<br>Device clamped |        | 50 m/s <sup>2</sup>  |  |
|       |   |        | 200 m/s <sup>2</sup> |  |
| m     | Weight  |        | 0.46 kg              |  |
| $D_s$ | Surface creepage distance                           | $\geq$ | 33 mm                |  |
| $D_a$ | Air strike distance                                 | $\geq$ | 20 mm                |  |

**On-state** (see Fig. 1, 2)

|               |  |                                      |  |  |
|---------------|--|--------------------------------------|--|--|
| $I_{FAVM}$    | Max. average on-state current          | 380 A                                | Half sine wave, $T_c = 70^\circ\text{C}$ |  |
| $I_{FRMS}$    | Max. RMS on-state current              | 600 A                                |  |  |
| $I_{FSM}$     | Max. peak non-repetitive surge current | 10 kA                                | $t_p = 10\text{ ms}$                     | Before surge:<br>$T_c = T_j = 115^\circ\text{C}$ |
|               |  | 22 kA                                | $t_p = 1\text{ ms}$                      |  |
| $\int I^2 dt$ | Max. surge current integral            | $0.5 \cdot 10^6\text{ A}^2\text{s}$  | $t_p = 10\text{ ms}$                     | After surge:<br>$V_R \approx 0\text{ V}$         |
|               |  | $0.24 \cdot 10^6\text{ A}^2\text{s}$ | $t_p = 1\text{ ms}$                      |  |
| $V_F$         | Forward voltage drop                   | $\leq 5.2\text{ V}$                  | $I_F = 900\text{ A}$                     | $T_j = 115^\circ\text{C}$                        |
| $V_{F0}$      | Threshold voltage                      | 2.7 V                                | Approximation for                        |  |
| $r_F$         | Slope resistance                       | 2.8 m $\Omega$                       | $I_F = 200 \dots 2000\text{ A}$          |  |

**Turn-on** (see Fig. 3, 4)

|          |                               |                     |   |
|----------|-------------------------------|---------------------|---|
| $V_{fr}$ | Peak forward recovery voltage | $\leq 370\text{ V}$ | $di/dt = 1000\text{ A}/\mu\text{s}$ , $T_j = 115^\circ\text{C}$ |
|----------|-------------------------------|---------------------|---|

**Turn-off**

|                |                                     |                                 |  |                           |
|----------------|-------------------------------------|---------------------------------|--|---------------------------|
| $di/dt_{crit}$ | Max. decay rate of on-state current | $\leq 340\text{ A}/\mu\text{s}$ | $I_F = 900\text{ A}$ ,<br>$V_{Dclink} = 3300\text{ V}$ | $T_j = 115^\circ\text{C}$ |
| $I_{rr}$       | Reverse recovery current            | $\leq 600\text{ A}$             |  |                           |
| $Q_{rr}$       | Reverse recovery charge             | $\leq \mu\text{C}$              |  |                           |
| $E_{rr}$       | Turn-off energy                     | $\leq 3.5\text{ J}$             |  |                           |

**Thermal**

|            |                                      |                            |                     |                               |
|------------|--------------------------------------|----------------------------|---------------------|-------------------------------|
| $T_j$      | Operating junction temperature range | -40...115 $^\circ\text{C}$ |                     |                               |
| $T_{stg}$  | Storage temperature range            | -40...125 $^\circ\text{C}$ |                     |                               |
| $R_{thJC}$ | Thermal resistance junction to case  | $\leq 44\text{ K/kW}$      | Anode side cooled   | $F_m = 18 \dots 22\text{ kN}$ |
|            |                                      | $\leq 44\text{ K/kW}$      | Cathode side cooled |                               |
|            |                                      | $\leq 22\text{ K/kW}$      | Double side cooled  |                               |
| $R_{thCH}$ | Thermal resistance case to heatsink  | $\leq 10\text{ K/kW}$      | Single side cooled  |                               |
|            |                                      | $\leq 5\text{ K/kW}$       | Double side cooled  |                               |

Analytical function for transient thermal impedance.

$$Z_{thJC}(t) = \sum_{i=1}^n R_i (1 - e^{-t/\tau_i})$$

|  |       |        |       |        |
|--|-------|--------|-------|--------|
| i  | 1     | 2      | 3     | 4      |
| $R_i(\text{K/kW})$                               | 9.74  | 3.12   | 1.18  | 0.52   |
| $\tau_i(\text{s})$                               | 0.387 | 0.0457 | 0.006 | 0.0018 |
| $F_m = 18 \dots 22\text{ kN}$ Double side cooled |       |        |       |        |
