1A LOW DROPOUT LINEAR REGULATOR AP2218

General Description

The AP2218 is a low dropout linear regulator with a typical dropout of 300mV at 1A output current.

The AP2218 provides current limit and thermal shutdown. On-chip thermal shutdown provides protection against any combination of high current and ambient temperature that would create excessive junction temperatures.

The AP2218 has 3.3V and 5.0V versions.

The AP2218 is available in the industry standard TO-220F-4 package.

Features

- Minimum Guaranteed Output Current: 1A

- Reversed-battery and Reversed-lead Insertion Protection
- Fast Transient Response

Applications

- Power Module
- Set Top Box
- LCD TV
- PDP TV
