

Descriptions

This series of fixed-negative-voltage monolithic integrated-circuit voltage regulators is designed to complement series S7800 in a wide range of applications. These applications include on-card regulator for elimination of noise and distribution problems associated with single point regulations. Each of these regulators can deliver up to 1.0 amperes of output current. The internal current Limiting and thermal shutdown features of these regulators make them essentially immune to overload. In addition to use as fixed-voltage regulators, these devices can be used with external components to obtain adjustable output voltages and also as the power pass element in precision regulators.

Features

- Output Current of 1A
- Thermal Shutdown Protection
- Short-Circuit Current Limit Protection
- No External Components
- Output Transistor Safe Operating Area Protection

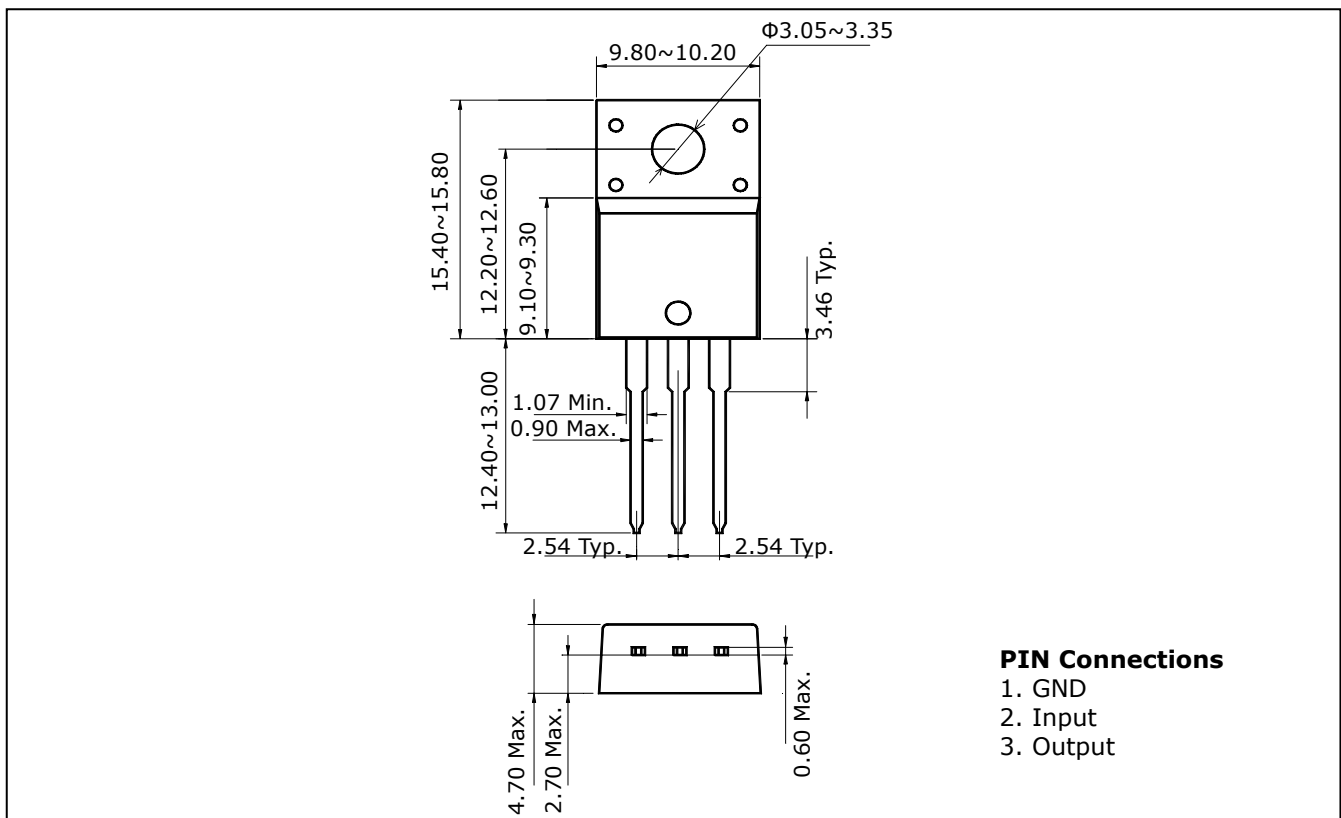

Ordering Information

| Type NO. | Marking | Package Code |
|----------|---------|--------------|
| S79xxPI | S79□□PI | TO-220F-3L |

□□: Voltage Code (05: -5V, 08: -8V, 09: -9V, 12: -12V, 15: -15V)

Outline Dimensions

unit: mm

Absolute Maximum Ratings

Ta=25°C

| Characteristic | Symbol | Ratings | Unit |
|--------------------------------------|-----------|-----------|------|
| Operating Input Voltage | V_{IN} | -35 | V |
| Power Dissipation (Tc=25°C) | P_D | 20.8 | W |
| Power Dissipation (without Heatsink) | P_D | 2.0 | W |
| Operating Temperature Range | T_{opr} | -40 ~ 85 | °C |
| Junction Temperature | T_j | 150 | °C |
| Storage Temperature Range | T_{STG} | -55 ~ 150 | °C |

Electrical Characteristics

($T_j = 0$ to 125°C , $V_{in} = -10\text{V}$, $I_{out} = 500\text{mA}$, unless otherwise specified.)

| Characteristic | Symbol | Test Condition * | S7905PI | | | Unit | |
|---|------------------|--|--------------------------|------|-------|------|----------------------------|
| | | | Min. | Typ. | Max. | | |
| Output Voltage ** | V_{OUT} | $T_j = 25^\circ\text{C}$ | -5.20 | -5.0 | -4.80 | V | |
| | | $I_{OUT} = 5\text{mA} \sim 1\text{A}$, $V_{IN} = -20\text{V} \sim -7.0\text{V}$ | -5.25 | -5.0 | -4.75 | | |

The AUK Corp. products are intended for the use as components in general electronic equipment (Office and communication equipment, measuring equipment, home appliance, etc.).

Please make sure that you consult with us before you use these AUK Corp. products in equipments which require high quality and / or reliability, and in equipments which could have major impact to the welfare of human life(atomic energy control, airplane, spaceship, transportation, combustion control, all types of safety device, etc.). AUK Corp. cannot accept liability to any damage which may occur in case these AUK Corp. products were used in the mentioned equipments without prior consultation with AUK Corp..

Specifications mentioned in this publication are subject to change without notice.
