## Reed Sensors for

## APPLICATIONS

- Electronic PCB's where all components are surface mounted
- Telecommunication applications Hook switch in mobile and hard-wired phones
- Switching element in microphones

## DESCRIPTION

MK15 are magnetically operated Reed proximity switches for SMD mounting.

- . Lead design 1: Flat, straight leads for PCB slot mounting.
- . Lead design 2: Flat, bent SMD leads.

The sensors are supplied taped \& reeled according to IEC 286/part 3 suitable for auto-placement. The special features of this series are the small dimensions of only $19.5 \times 2.5 \times 2.5 \mathrm{~mm}$ and the simple internal structure (low-cost version).

## FEATURES

- Excellent for low power operations
- High power switches available
- Six operate sensitivities available
- Tape and Reel available
- No external power required for sensor operation
- UL approved
