

Distinctive Characteristics

Full face and spot illumination available. Front panel relamping.

Choice of super bright LEDs in white, green, and blue in addition to bright red, amber, and green LEDs.

Compact front panel design with 9mm square or round bezel options.

Rear panel threaded mounting. Behind panel depth of less than one inch. 8mm body diameter fits common size panel cutout.

Latchdown feature gives indication of circuit status. Audible and tactile feedback with smooth and responsive operation.

Dual, sliding contacts with self-cleaning action provide contact stability, high reliability, and increased operating life.

Solder lug terminals have spacing of .100" (2.54mm) for choice of mounting.

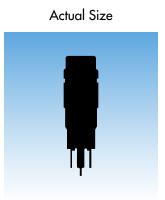

Longer normally closed terminal facilitates wiring and soldering.

Molded-in terminals lock out flux, dust, and other contaminants.

Nonilluminated models available and shown in the Pushbutton section.

Matching indicators available and shown at the end of Section M.

General Specifications

Electrical Capacity (Resistive Load)

Power Level (code W): 0.1A maximum @ 30V AC/DC

Other Ratings

Contact Resistance:	50 milliohms maximum				
Insulation Resistance:	100 megohms minimum @ 500V DC				
Dielectric Strength:	: 500V AC minimum for 1 minute minimum				
Mechanical Life:	100,000 operations minimum				
Electrical Life:	50,000 operations minimum				
Nominal Operating Force:	3.43N				
Contact Timing:	Nonshorting (break before make)				
Travel:	Pretravel .087" (2.2mm); Overtravel .031" (0.8mm); Total Travel .118" (3.0mm)				

Materials & Finishes

Glass fiber reinforced polyamide
Glass fiber reinforced polyamide
Phosphor bronze with silver plating

Environmental Data

Operating Temp Range:	–25°C through +50°C (–13°F through +122°F)
Humidity:	90 ~ 95% humidity for 96 hours @ 40°C (104°F)
Vibration:	10 ~ 55Hz with peak-to-peak amplitude of 1.5mm traversing the frequency range & returning
	in 1 minute; 3 right angled directions for 2 hours
Shock:	50G (490m/s ²) acceleration (tested in 6 right angled directions, with 5 shocks in each direction)

Installation

Mounting Torque: Cap Installation Force: Soldering Time & Temperature: 0.49Nm (4.34 lb•in) maximum for round mounting nut 9.8N (2.2 lbf) maximum downward force on cap Manual Soldering: See Profile A in Supplement section.

LED COLORS & SPECIFICATIONS

The electrical specifications shown are determined at a basic temperature of 25°C. LED circuit is isolated and requires external power source. Single element LED is colored in OFF state. If the source voltage exceeds the rated voltage, a ballast resistor is required. The resistor value can be calculated by using the formula in the Supplement section.

ASSEMBLY INSTRUCTIONS

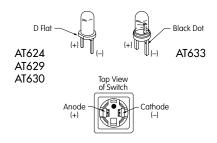

Cap Removal

- Have cap in extended position (not latchdown) for alternate action models.
- Use the grip slots on the sides of the cap and pull it out of the switch.

LED Polarity & Orientation in Lamp Socket

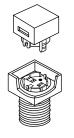

For AT624, AT629, AT630: Insert the LED with the D flat opposite the black dot molded inside the switch lamp socket. For AT633: Insert the LED with the Black Dot on the terminal to the right.

1. Match the prongs on

Cap Replacement

- the cap base with the projections in the switch, at the same time aligning the spring clips on the cap with the indentations in the switch.
- 2. Press firmly in place.

AT111 Lamping Tool

Lamping Tool AT111 may be used to remove and replace LED.

Attention

Electrostatic nsitive Devices

AT110 Socket Wrench

Super Bright LEDs AT624, AT629,

& AT630 are electrostatic sensitive.

Socket Wrench AT110 may be used to tighten the mounting nut.
