

INTRODUCTION

molex® 2.00mm (.079") Pitch iGrid™ WTB Dual-Row System, with Internal Positive Lock

Molex's iGrid wire-to-board connector system offers a compact design and anti-tangle internal lock for applications such as gaming machines, appliances, industrial and other equipment requiring good mating retention.

The unique inner lock of iGrid prevents wire from getting tangled in the latch, compared to outer lock types where such damage can easily occur. The inner lock also provides space savings, an audible click and a robust design to withstand rugged handling.

The system is available in AWG #22-28 in both vertical and right angle designs, from 10-40 circuits.
