## ACTIVE SIGNAL AMPLIFIER lin \&lout T11/12/21/22_D/S

## DESCRIPTION

The series is a high integration, high efficiency polygonal - line active isolation amplifier module, with anterior circuit current signal input and posterior current signal output. These modules are embed with a high efficiency isolated micro-power source, which can provide a electrics-feed for signal input. In the two-wire three-wire and four-wire circuit applications, our products largely predigest customers' design helpfully improve the using room ratio of PCB. Adopting electromagnetism isolation technology, it is available to keep high accuracy and natural extremely low temperature drift. The isolation voltage among the input, output, power supply and isolated power output can up to 2.5 KVDC .

## FEATURES

- Four-port isolation (Among input, output, power supply and Isolation Power output)
- High accuracy (0.1\% F.S.)
- High linearity (0.1\% F.S.)
- Isolation voltage(2500VDC/60S)
- High frequency response( 15 KHz )
- Extremely low temperature(35PPM $\left./{ }^{\circ} \mathrm{C}\right)$
- Industry standard(Operating Temperature Range:- $25^{\circ} \mathrm{C}$ to $71^{\circ} \mathrm{C}$ )
