PART NUMBER: VLD24-XXX **DESCRIPTION:** constant current dc-dc converter

applications

The VLD24-XXX series is a step-down constant current source designed for driving high power LEDs. The available output currents are: 300mA, 350mA, 500mA, 600mA, 700mA. Despite its compact size, the VLD24-XXX series is fully featured with very high efficiency, wide input voltage range, high ambient operating temperature, and two means of LED dimming: PWM digital dimming and analog dimming control, via a trim POT.

features

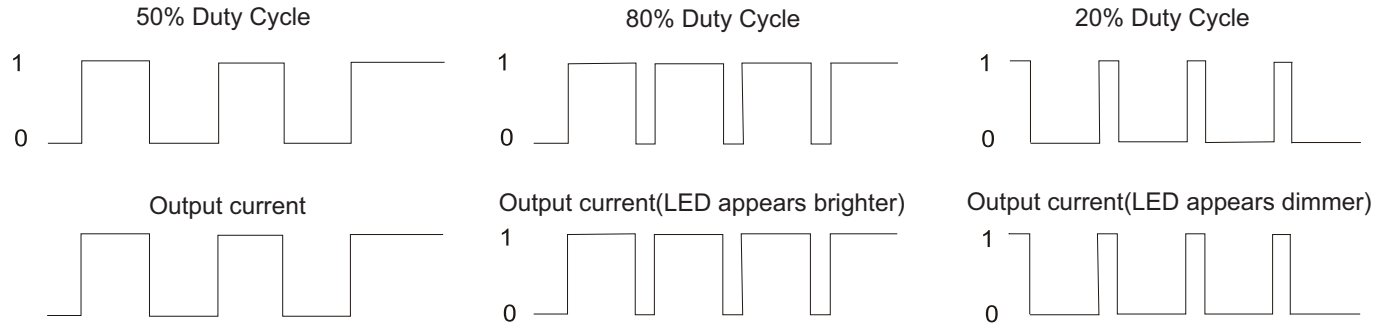
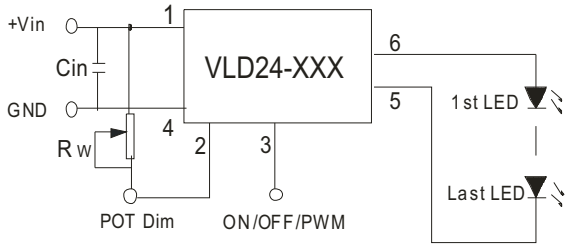
DIGITAL DIMMING CONTROL



PART NUMBER: VLD24-XXX **DESCRIPTION:** constant current dc-dc converter

ANALOG DIMMING CONTROL



Cin = 47µF for best performance

Io can be set between 0A and Io(max) with trim pot Rw. For example, to set the output current (Io) to 200mA using the VLD24-350, choose Rw=0.4Ω. The trim pot should be placed close to pins 1 and 2 with shortest possible leads.
