## FX2 Relay

2 pole telecom / signal relay
Through Hole Type (THT)
Polarized, latching or non-latching 1 coil
Relay types: sensitive non lachting version with 1 coil high sensitive non latching version with 1 coil, latching with 1 coil

ROHS compliant (Directive 2002/95/EC) as per product date code 0342 / halogen free.

## Features

- Telecom/signal relay (dry circuit, test access, ringing)
- Slim line $15 \times 7.3 \mathrm{~mm}, 0.590 \times 0.287$ inch
- Switching current 2 A
- 2 changeover contacts (2 form C / DPDT)
- Bifurcated contacts
- High sensitivity results in low nominal power consumption 80 mW for high sensitive, 140 mW for sensitive version
- High dielectric characteristic $\leq 1800$ Vrms also between open contact
- High surge capability ( $1.2 / 50 \mu \mathrm{~s}$ and $10 / 700 \mu \mathrm{~s}$ ) meets
Telcordia GR 1089 and FCC Part 68
$\leq 2500 \mathrm{~V}$ between open contacts
$\leq 3500 \mathrm{~V}$ between coil and contacts
- High mechanical shock up to 300 G functional up to 1500 G survival
- Hermetically sealed (RT V)

## Typical applications

- Communications equipment linecard application - analog, ISDN, xDSL, PABX Voice over IP
- Office and business equipment
- Measurement and control equipment
- Consumer electronics

Set top boxes, HiFi

- Medical equipment

## Insulation category

Supplementary insulation according
IEC / EN 60950
Working voltage $\leq 300$ Vrms
$\leq 250 \mathrm{Vrms}$
2500 V
Internal: 1
External: 2
V-0
$85^{\circ} \mathrm{C}$

## FX2 Relay

#### Abstract

IM Relays 4th generation slim line - low profile polarized 2 c/o telecom signal relay with bifurcated contacts, available as non latching or latching relay with 1 coil. Nominal voltage range from 1.5 ... 24 V , coil power consumption of 50 ... 200 mW , latching relays with 1 coil 100 mW . The IM relay is available as through hole and surface mount type (J-Legs and Gull Wings) and capable to switch loads up to $60 \mathrm{~W} / 62,5 \mathrm{VA}$. It is currently the only 2 A rated 4 G relay on the market. Dielectric strength fulfills the Telcordia requirements according GR $1089(2,5 \mathrm{kV}-2 / 10 \mu \mathrm{~s})$ and FCC part $68(1,5 \mathrm{kV}-10 / 160 \mu \mathrm{~s})$. The IM relay is tested according CECC/IECQ and certified in accordance with IEC/EN 60950 and UL 60950. Dimensions approx. $10 \times 6 \mathrm{~mm}$ board space and 5.65 mm height.

## P2 Relays

3rd generation polarized 2 c/o telecom relay with bifurcated contacts, available as non latching or latching relay with 1 or 2 coils. Nominal voltage range from $3 \ldots 24 \mathrm{~V}$, coil power consumption 140 mW , latching relays with 1 coil 70 mW . The P2 Relay is available as through hole or surface mount type and capable to switch currents up to 5 A . Dielectric strength fulfills the Telcordia requirements according GR $1089(2,5 \mathrm{kV}-2 / 10 \mu \mathrm{~s})$ and FCC part $68(1,5 \mathrm{kV}-10 / 160 \mu \mathrm{~s})$. The P2 relay is tested according CECC/IECQ and certified in accordance with IEC/EN 60950 and UL 60950. Dimensions approx. $15 \times 7,5 \mathrm{~mm}$ board space and 10 mm height.

## FX2 Relays

3rd generation polarized 2 c/o telecom relay with bifurcated contacts available as non latching or latching relay with 1 coil. Nominal voltage range from $3 \ldots 48 \mathrm{~V}$, coil power consumption of $80 \ldots 260 \mathrm{~mW}$ for the high sensitive version, 140... 300 mW for the standard version, latching relays with 1 coil 100 mW . The FX2 relay is available as through hole type and capable to switch loads up to $60 \mathrm{~W} / 62,5 \mathrm{VA}$. Dielectric strength fulfills the Telcordia requirements according GR $1089(2,5 \mathrm{kV}-2 / 10 \mu \mathrm{~s})$ and FCC part $68(1,5 \mathrm{kV}-10 / 160 \mu \mathrm{~s})$. The FX2 relay is tested according CECC/ IECQ and certified in accordance with IEC/EN 60950 and UL 60950.
Dimensions approx. $15 \times 7,5 \mathrm{~mm}$ board space and $10,7 \mathrm{~mm}$ height.

## FT2 / FU2 Relays

3rd generation non polarized, non latching 2 c/o telecom relay with bifurcated contacts. Nominal voltage range from $3 \ldots 48 \mathrm{~V}$, coil power consumption $200 \ldots 300 \mathrm{~mW}$. Most sensitive 48 V relay. Available as through hole and surface mount type. Dielectric strength fulfills the Telcordia requirements according GR $1089(2,5 \mathrm{kV}-2 / 10 \mu \mathrm{~s})$ and FCC part $68(1,5 \mathrm{kV}-10 /$ $160 \mu \mathrm{~s}$ ). The FT2/FU2 relay is tested according CECC/IECQ and certified in accordance with IEC/EN 60950 and UL 60950.
Dimensions approx. $15 \times 7,5 \mathrm{~mm}$ board space and 10 mm height.

## FP2 Relays

3rd generation polarized 2 c/o telecom relay with bifurcated contacts, available as non latching or latching relay with 1 or 2 coils. Nominal voltage range from $3 \ldots 48 \mathrm{~V}$, coil power consumption of $80 \ldots 260 \mathrm{~mW}$ for the high sensitive version, $140 \ldots 300 \mathrm{~mW}$ for the standard version, latching relays with 1 coil 100 mW .. The FP2 Relay is available as through hole type and capable to switch loads up to $60 \mathrm{~W} / 62,5 \mathrm{VA}$. Dielectric strength fulfills FCC part $68(1,5 \mathrm{kV}-10 / 160 \mu \mathrm{~s})$. The FP2 is tested according CECC/IECQ approved.
Dimensions approx. $14 \times 9 \mathrm{~mm}$ board space and 5 mm height.

## MT2

2nd generation non polarized, non latching $2 \mathrm{c} / \mathrm{o}$ telecom and signal relay with bifurcated contacts. Nominal voltage range from 3 ... 48 V , coil power consumption 150/200/300/400 and 550 mW . Dielectric strength fulfills the requirements according FCC part 68 ( $1,5 \mathrm{kV}-10 / 160 \mu \mathrm{~s}$ ).
Dimensions approx. $20 \times 10 \mathrm{~mm}$ board space and 11 mm height.

## D2n Relays

2nd generation non polarized 2 c/o relay for telecom and various other applications. Nominal voltage range from $3 \ldots 48 \mathrm{~V}$, coil power consumption from 150 .... 500 mW . The D2n relay is capable to switch currents up to 3A. Dielectric strength fulfills the requirements according FCC part $68(1,5 \mathrm{kV}-10 / 160 \mu \mathrm{~s})$. Dimensions approx. $20 \times 10 \mathrm{~mm}$ board space and 11 mm height.

## P1 Relays

Extremely sensitive, polarized $1 \mathrm{c} / \mathrm{o}$ relay with bifurcated contacts for a wide range of applications, available as non latching or latching relay with 1 or 2 coils. Nominal voltage range from $3 \ldots 24 \mathrm{~V}$, coil power consumption 65 mW , latching relays with 1 coil 30 mW . The P1 relay is available as through hole or surface mount type and capable to switch currents up to 1 A. Dielectric strength fulfills the requirements according FCC part 68 (1,5 $\mathrm{kV}-10 / 160 \mu \mathrm{~s}$ ). Dimensions approx. $13 \times 7,6 \mathrm{~mm}$ board space and 7 mm height for THT or 8 mm height for SMT version.

## W11 Relays

Low cost, non polarized 1 c/o relay for various applications. Nominal voltage range from $3 \ldots 24 \mathrm{~V}$, coil power consumption 450 mW , sensitive versions 200 mW . The W11 relay is capable to switch currents up to 3 A . Dielectric strength 1000 Vrms.
Dimensions approx. $15,6 \times 10,6 \mathrm{~mm}$ board space and $11,5 \mathrm{~mm}$ height.

## Reed Relays

High sensitive, non polarized relay for telecom and various other applications, available with $1 \mathrm{n} / \mathrm{o}, 2 \mathrm{n} / \mathrm{o}$ or 1c/o contacts. Nominal voltage range from $5 \ldots 24 \mathrm{~V}$, coil power consumption $50 \ldots 280 \mathrm{~mW}$ for $1 \mathrm{n} / \mathrm{o}$ and $125 \ldots$ 280 mW for $2 \mathrm{n} / \mathrm{o}$ or $1 \mathrm{c} / \mathrm{o}$ versions. Reedrelays are available in DIP or SIL housing and capable to switch currents up to 0,5 A. Integrated diode and/or electrostatic shield optional. Dielectric strength 1500 Vdc. Dimensions approx. $19,3 \times 7 \mathrm{~mm}$ board space and $5 \ldots 7,5 \mathrm{~mm}$ height for DIP or $19,8 \times 5 \mathrm{~mm}$ board space and $7,8 \mathrm{~mm}$ height for SIL version.

## Cradle Relays

Extremely reliable and mature relay family of 1st generation for various signal switching applications. Available as non polarized, polarized / latching and relay with AC coil. The benefit is the possibility of combining various contact sets from 1 up to 6 poles, single and bifurcated contacts, different contact materials with a coil voltage range from $1,5 \mathrm{Vdc}$ to 220 Vac . Cradle relays are available as dust protected and hermetically sealed versions, with plug in or solder terminals and are capable to switch currents up to 5 A . Forcibly guided (linked) contact sets optional. Dielectric strength 500 Vrms. Dimensions from approx. $19 \times 24$ to $19 \times 35 \mathrm{~mm}$ board space and 30 mm height.

## Other Relays

We offer a variety of different relay families for maintenance and replacement purposes. These relays are up to 50-plus years old now, such as Card Relay SN (V23030 series), Small General Purpose Relay (V23006 series), Small Polarized Relay (V23063 ... V23067 and V23163 ... V23167 series). Accessories like sockets, hold down springs, etc. optional.

## High Frequency Relays

HF3 / HF3S / HF6 series RF relays offering excellent RF characteristics in a small package. All HF series relays are suitable for SMD soldering processes. Available as non latching or latching versions with 1 or 2 coils and a nominal coil voltage range from $3 \ldots 24 \mathrm{~V}$, a coil power consumption of 140 mW or 70 mW (single coil latching types).

HF3: Low cost RF relay suitable up to 3 GHz . Impedance 50 and 75 Ohm. 50 W hot switching and 50 W RF power carry capability. Dimensions $14.6 \times 7.3 \times 10.3 \mathrm{~mm}$.

HF3S: High performance, high power RF relay suitable up to 3 GHz , 50 W hot switching and 150 W RF power carry capability. Dimensions $15 \times 7.6 \times 10.6 \mathrm{~mm}$.

HF6: High performance, high power RF relay suitable up to 6 GHz , 50 W hot switching and 50 W RF power carry capability.
Dimensions $15 \times 7.6 \times 10.6 \mathrm{~mm}$.
