1. Introduction

ZTE CDMA 1X card fits into a standard Type II PC Card slot (available on most notebook PCs) and functions as a wireless network card, a modem, and a mobile phone. This card allows you to connect to the Internet, send and receive short messages, and make phone calls, without the need of a network cable or phone line.

With the design of the R-UIM card separate from the body, as well as making the card and body integrative, ZTE CDMA 1X card can make the operation more flexible.

2. Specifications

Item \ Model	MC315	MC315+	MG466	MG166
Tx Frequency	824~849MHz	824~849MHz	452.5~457.5MHz	1850~1910MHz
Rx Frequency	869~894MHz	869~894MHz	462.5~467.5MHz	1930~1990MHz
Freq. Tolerance	FA±300Hz			FA±150Hz
Dimension	86*54*5 mm			
Weight	33g			
Data Rate	MAX 153.6 kbps			
Voltage	3.3V from PCMCIA Slot			
Current	Dormancy: 90mA Maximum: 850mA			
Transmitter Power	200mW			

3. Care for Your Card

- Protect the card from liquids, dust, and excessive heat.
- **Optimal signal strength is usually obtained when the antenna is perpendicular to the card. The antenna should bend easily. Do not forcefully bend the antenna or plug the antenna in and out of the card frequently. ZTE shall not be held responsible for the loss due to user's misoperation.**
- The card should fit easily into your PC slot. Forcing the card into a slot may damage connector pins.
- Do not operate the card near any equipment which may be susceptible to electromagnetic interference.

4. Features

Your ZTE CDMA 1X card may need R-UIM card. Contact your provider to get the information that if your ZTE CDMA 1X card need the R-UIM card. Please insert the R-UIM card to your ZTE CDMA 1X card if it needs.

Insert R-UIM card to ZTE CDMA 1X card (only for those which need R-UIM card)
