8. Packing Specifications

8-1. Moisture-proof Packing

To prevent moisture absorption during transportation and storage, reels are packed in aluminum envelopes which contain a desiccant with a humidity indicator.

8-2. Storage

To prevent moisture absorption, it is strongly recommended that reels (in bulk or taped) should be stored in the dry box (or the desiccator) with a desiccant as the appropriate storage place. If not, the following is recommended.

Temperature: 5~30C Humidity: 60%RH max

The devices should be mounted as soon as possible after unpacking. If you store the unpacked reels, please store them in the dry box or seal them into the envelop again.

9. Precautions

9-1. Soldering

(1) Lead free soldering

- 1) Following soldering paste is recommended Melting temperature: $216 \sim 220C$. Composition: Sn 3.5Ag 0.75Cu
- 2) The temperature profile at the top surface of the parts is recommended as shown below.
- 3) It is requested that products should be handled after their temperature has dropped down to the normal room temperature

9-2. Washing

- (1) When washing after soldering is needed, following conditions are requested.
- a) Washing solvent: Pure Water
- b) Temperature, time: $50\mathrm{C}$ or less \times 30 seconds max. or $30\mathrm{C}$ or less \times 3 minutes max.
- c) Ultrasonic washing: 300W or less

9-3. Other directions

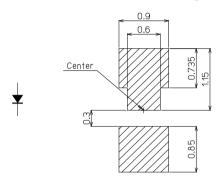

- (1) It is requested to avoid any stress added to the resin portion while it is heated.
- (2) It is requested to avoid any friction by sharp metal nail etc. to the resin portion.

10. Designing precautions

- (1) The current limiting resistor should be placed in the circuit so that is driven within its rating. Also avoid reverse voltage (over-current) applied instantaneously when ON or OFF.
- (2) When pulse driving current is applied, average current consumption should be within the rating. Also avoid reverse voltage applied when put off.
- (3) Recommended soldering pattern

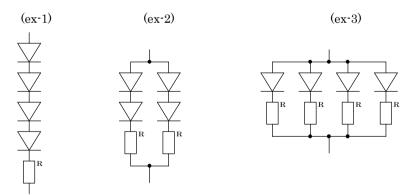

<For reflow soldering>

Unit: mm

The above dimensions are not the one which guarantee the performance of mount ability. The use of the above pattern is recommended to use after deep study at your site.

- (4) When assembling the circuit board into the finished products, care must be taken to avoid the component parts from touching other parts.
- (5) When using multiple LEDs, it is required to connect a current limiting resistor on each path which the current flows to the LEDs.

- (6) Other
- 1) This product complies with RoHs directives.
- 2) When this product is secondarily fabricated such as change in shape, it is not included in our warranty.
- 3) The agreement of formal product specification is required prior to mass production.
