1. Application

This product applies computer peripheral, industrial meter, image communication, web-pad, e-boobs and multi-media.

2. Features

- . Pixel in stripe configuration
- . Slim and compact
- . Display Colors : 262,144 colors
- . Viewing Direction : 6 o'clock
- . Slim module design for mobile electronics device application

8. Power On Sequence

- 1. The supply voltage for input signals should be same as $V_{CC.}$
- 2. When the power is off , please keep whole signals (Hsync, Vsync, CLK, Data) low level or high impedance

All the optical measurement shall be executed 30 minutes after backlight being turn-on. The optical characteristics shall be measured in dark room (ambient illumination on panel surface less than 1 Lux). The measuring configuration shows as following figure.

Luminance when LCD is Black

Contrast Ratio is measured in optimum common electrode voltage.

- Note 9-2 : Topcon BM-7(fast) luminance meter 2° field of view is used in the testing (after 20~30 minutes' operation).

10. Handling Cautions

- 10-1) Mounting of module
 - a) Please power off the module when you connect the input/output connector.
 - b) Please connect the ground pattern of the inverter circuit surely. If the connection is not perfect, some following problems may happen possibly.
 - 1. The noise from the backlight unit will increase.
 - 2. The output from inverter circuit will be unstable.
 - 3.In some cases a part of module will heat.
 - c) Polarizer which is made of soft material and susceptible to flaw must be handled carefully.
 - d) Protective film (Laminator) is applied on surface to protect it against scratches and dirts. It is recommended to peel off the laminator before use and taking care of static electricity.
- 10-2) Precautions in mounting
 - a) When metal part of the TFT-LCD module (shielding lid and rear case) is soiled, wipe it with soft dry cloth.
 - b) Wipe off water drops or finger grease immediately. Long contact with water may cause discoloration or spots.
 - c) TFT-LCD module uses glass which breaks or cracks easily if dropped or bumped on hard surface. Please handle with care.
 - d) Since CMOS LSI is used in the module. So take care of static electricity and earth yourself when handling.

10-3) Adjusting module

- a) Adjusting volumes on the rear face of the module have been set optimally before shipment.
- b) Therefore, do not change any adjusted values. If adjusted values are changed, the specifications described may not be satisfied.
- 10-4) Others
 - a) Do not expose the module to direct sunlight or intensive ultraviolet rays for many hours.
 - b) Store the module at a room temperature place.
 - c) The voltage of beginning electric discharge may over the normal voltage because of leakage current from approach conductor by to draw lump read lead line around.
 - d) If LCD panel breaks, it is possibly that the liquid crystal escapes from the panel. Avoid putting it into eyes or mouth. When liquid crystal sticks on hands, clothes or feet. Wash it out immediately with soap.
 - e) Observe all other precautionary requirements in handling general electronic components.
 - f) Please adjust the voltage of common electrode as material of attachment by 1 module.
 - g) The UL number for PCB is EE2956.
