METAL LOCATOR

High sensitivity, robust, hand-held metal locator for body search and rapid identification of metal objects in security situations.

This all new high performance metal detector is from *C-Scope International Ltd.*, acknowledged world leaders in the manufacture of portable metal detection equipment.

This metal locator is designed to meet the exacting requirements of the security industry. Typical uses will include body search for offensive weapons in crowd control, airport and border security, checking packets and letters for metal in the mail-room, stock security at the factory gate; anywhere that hidden metal needs to be detected.

The *C-Scope Metal Locator* is constructed from high impact ABS with simple single control operation. Twin search coil technology means high sensitivity to the widest range of metals with rapid surface coverage. The delicate search coils themselves are set rock solid into STYRENE based resin making them virtually indestructible. Contrast this with the fragile ferrite rods and flimsy coil construction used on cheaper types of metal detector.

This *C-Scope Metal Locator* is a tough product for use in a tough world where security is a vital consideration. Insist on *C-Scope* quality and performance.

SPECIFICATION

- * High sensitivity, twin coil induction balance metal detector.
- * Dimensions 9cms x 28cms x 3.2cms.
- * PP3 type battery power source. Low battery indication - long battery life.
- * Normal operating temperature range -9° to +54°C.
- * High impact ABS construction. Comfortable to hold and light-weight.
- * Audio and visual indication of metal.
- * Simple, single control operation - No specialist knowledge required.
- * Earphone socket, for use in noisy work situations.

DETECTION RANGE GUIDE

.38 calibre hand gun	20cm - 28cm
Pen knife	10cm - 15cm
Razor blade	5cm - 10cm

Order code 720-1667.
Metal detector.

When using for locating cable locating the range of this detector is very short, and will not detect cables buried deep the wall.

The range will be no more than a centimeter or so.

This is because this device is more for searching through clothes and such things.
