

LEDU 231

INCANDESCENT LIGHT WITH BRIGHT ILLUMINATION

The Ledu 231 reading/work lamp is approved for a full 100 W. The Ledu 231 is suitable for desk work, at the drawing board and at the assembly bench - anywhere, in fact, where lots of light is required. The shade has a functionally correct design and distributes the light evenly over a large area. The Ledu 221 has the same functions as the Ledu 231, but is designed for use with a 75 W bulb.

LEDU 251

FLUORESCENT TUBE, LOTS OF LIGHT - LITTLE HEAT

The Ledu 251 fluorescent light fitting is suitable wherever a lot of light is needed or where large areas need to be lit. Using fluorescent tubes as the light source results in high illumination, low electricity consumption and minimum heat generation, which keeps the shade cool at all times. The Ledu 251 has a unique shade joint to provide maximum adjustment.

ARTICLE NUMBERS

231, 221

COLOURS

White, grey and red

DIMENSIONS

Arm length 105 cm

Shade Ø 20 cm (231), Ø 17.5 cm (221), height 18.2 cm

ACCESSORIES

Table clamp, table base, prismatic diffuser and floor stand

LEDU

Place the copyholder close to the screen. Adjust the height and angle of the plate to achieve a comfortable working position that cuts out awkward turning movements.

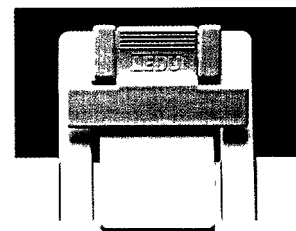

COPYHOLDERS

FOR THE CORRECT ERGONOMIC WORKING POSITION

The proper use of a copyholder enables you to achieve a comfortable ergonomic working position, avoiding strain on your back, shoulders and neck muscles and minimizing awkward head and eye movements. Copyholders are particularly important to people who do a lot of computer or typewriter work.

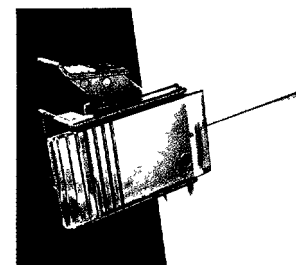

Ledu has a wide choice of copyholders specifically designed to meet modern requirements for functional offices and work stations. All our models are stable and easy to adjust to the required position. An easy-slide mechanism makes it easy to move the ruler to the next line of text or figures. The copyholder plate is made of non-reflecting, matt plastic.

The position of the paper grip can be adjusted to enable the copy holder to be used with larger sized papers.

HOW TO USE YOUR COPYHOLDER

- Place the copyholder right next to your terminal screen or typewriter.
- Position the copyholder at a height and reading distance to suit both yourself and the job at hand.
- Adjust the copyholder plate to a height and angle to cut out awkward head and eye movements. Result. You will be working in an ergonomically correct and comfortable position, saving your back and neck muscles from unnecessary strain and minimizing uncomfortable twisting and turning.

The copy holder has a unique ruler mechanism enabling the ruler to be moved smoothly to reach the required position. Just push the "button" for faster positioning.
