# Self-powered Time Counter

- Seven digits, time range 0 to 3999d23.9h.
- Dual time range: 999999.9  $\longleftrightarrow$  3999d23.9h or 999h59m59s  $\longleftrightarrow$  9999h59.9m

### **Model Number Structure**

### **■** Model Number Legend

1. Count Input

None: No-voltage input

V: PNP/NPN universal DC voltage input

FV: AC/DC multi-voltage input

2. Time Range

None: 999999.9h/3999d23.9h 1: 999h59m59s/9999h59.9m 3. Case Color

None: Light gray B: Black

4. Display

None: 7-segment LCD without backlight H: 7-segment LCD with backlight

### **Ordering Information**

Bottom view: View of the Time Counter rotated horizontally 180°

#### 

### **■** Connections

#### **H7ET Time Counter**

#### PNP/NPN Universal DC Voltage Input Model With Backlight

1. Contact Input (Input by a Relay or Switch Contact)

2. Solid-state Input

Note: 1. Terminals 2 and 4 (input circuit and reset circuit) are functionally isolated.

2. Select input transistors according to the following: Dielectric strength of the collector  $\geq$  50 V Leakage current < 1  $\mu$ A

#### PNP/NPN Universal DC Voltage Input Model Without Backlight No-voltage Input Model

1. Contact Input (Input by a Relay or Switch Contact)

Note: 1. Terminals 2 and 4 (input circuit and reset circuit) are functionally isolated.

2. Select input transistors according to the following: Dielectric strength of the collector ≥ 50 V Leakage current < 1 μA

#### **AC/DC Multi-voltage Input Model**

1. Contact Input (Input by a Relay or Switch Contact)

Note: Use Relays and Switches that have high contact reliability because the current flowing from terminals 1 or 3 is as small as approx. 10 µA. It is recommended that OMRON's G3TA-IA/ID be used as the SSR.

2. Solid-state Input (Open Collector Input of an NPN Transistor)

Note: 1. Residual voltage in the output section of Proximity Sensors or Photoelectric Sensors becomes less than 0.5 V because the current flowing from terminals 1 or 3 is as small as approx. 10  $\mu A$ , thus allowing easy connection.

2. Select input transistors according to the following: Dielectric strength of the collector ≥ 50 V Leakage current < 1 μA

### **Operation**

### **■** Operating Modes

### **Nomenclature**

**Note:** Perform switch setting before mounting to a control panel.

### **Dimensions**

Note: All units are in millimeters unless otherwise indicated.

#### H7ET-N

#### **Dimensions with Flush Mounting Bracket**

## Panel Cutout Separate mounting

•

#### Dense mounting

Waterproofing is not possible for dense mounting

- When mounting, insert the Counter into the cutout, insert the adapter from the back and push in the Counter while making the gap between the front panel and the cutout panel as small as possible. Use screws to secure the Counter. If waterproofing is desired, insert the waterproof packing.
- When several Counters are installed, ensure that the ambient temperature will not exceed specifications.
- The appropriate thickness of the panel is 1 to 5 mm.

Note: A Compact Flush Mounting Bracket (Y92F-35) can also be used. Refer to Accessories for details.
