# SAW RESONATORS

# SR418-T

#### FEATURES

• The SR418-T is a true one-port, Surface-acoustic-wave(SAW) resonator in a low-profile, TO-39 case. It provides reliable, fundamental-mode, quartz frequency stabilization of fixed-frequency transmitters operating at 418.0MHz.

### **APPLICATIONS**

Remote Control

#### PACKAGE

Standard package in Tube: 20pcs/Tube.

C TGS CRYSTALS LTD.

riangle Optional: please specify required code when inquiring or ordering

#### NOTE

- 1: Electrostatic Sensitive Device. Observe precautions for handling
- 2. Freq. Aging is the change in fc with time and is specified at +65°C or less. Aging may exceed the specification for prolonged temp. Above +65°C. TypicIly, aging
- is greatest the first year after manufacture, decreasing in subsequent years. 3. The centre freq. Fc, is the freq. Of minimum IL with te resonator in te specified test fixture in a  $50\Omega$  test system with VSWR  $\leq$ 1.2:1. Typically, f\_scillator or framsmier is less than the resonator fc.
- Typically, equipment utilizing this device requires emissions testing and government approval. Which s the responsibility of the equipment manufacturer
- SUnless noted otherwise, case temperature Tc=+25C  $\pm$ 2°C. 6.The design, manufacturing process, and specifications of this device are subject to change without notice. 7.Derived mathematically from one or more of the following directly measured
- parameters: fc, IL, 3 dB bandwidth, fc versus Tc, and Co 8. Turnover temperature, To, is the temperature of maximum (or turnover) freq., fo,
- The nominal center freq. at any case temp. , T<sub>c</sub>, may be calculated from :f=  $f_0 [1-FTC (T_0-T_c)^2]$ . Typically, oscillator T<sub>0</sub> is 20 °C less than the specified resonator To
