**Technical Documents** 

The following is a list of technical documents covering the application, performance and maintenance of Subminiature D Connectors and related tooling.

Product Specifications describe technical performance characteristics and verification tests. They are intended for the Design, Component and Quality Engineer.

# Cable Connectors—Pages 5 thru 77

108-40011—Connector, AMPLIMITE HDE-20 108-40030—AMPLIMITE HDE-20 Shielding Hardware

108-40012—Connector, AMPLIMITE HDF-20 (Low Profile)

108-46002—SHIELDED HDF-20 Low Profile Connectors

108-40005—Connector, AMPLIMITE HDP-20

108-40030 — AMPLIMITE Shielding Hardware, HDP-20 and HDE-20

108-40031—Connector, AMPLIMITE HDP-20 Solder Cup

108-40032--Accessories, Cable Clamp Assemblies, Shielded AMPLIMITE

108-40016—Connector System, AMPLIMITE HD-20 Cassette

# Board Mount Connectors—Pages 78 thru 109

108-1092 — Connector, AMPLIMITE, Right-Angle, HD-22 108-40025—Connector, AMPLIMITE HD-20, All-Plastic, Front Metal-Shell, Full Metal-Shell, Right-Angle and Straight Posted Pc Board Assemblies

108-40014—Connector, AMPLIMITE, ACTION PIN

108-40028—Connector, AMPLIMITE Stacked

Application Specifications describe requirements for using the product in its intended application and/or crimping information. They are intended for the Packaging and Design Engineer and the Setup person.

# Cable Connectors—Pages 5 thru 77

Male Screw Retainers for Metal-Shell Connectors (HDE and HDP)

Male Screw	Thread Size	Dimension	Male Screw Retainer Kit No.		
Finish	1111.E9f 2172	, . <b>A</b>	Individual	Bulk Packed*	
Yellow Chromate	4-40	.250	205980-1	205980-3	
	4-40	.200	745136-1**	745136-2**	
	M3 (Metric)	.250	207871-1	207871-2	
Clear	4-40	.250	205980-4	205980-5	
Chromate	4-40	.200	745136-3**	745136-4**	

\*Each part is individually bulk packed for multiple kit orders.
\*\*Retaining clips are stainless steel for Male Screw Retainer Series 745136.

Notes: 1. All parts are packaged unassembled.

Each kit is comprised of two male screws and two retaining clips. Male screw retainers are also furnished as part of cable clamp kits (pages 51 and 53).

 Male screw retainers mate with female screwlocks (page 61), with HDF metal-shell connectors featuring 4-40 threaded inserts (page 25) and with HD metal-shell board mount connectors featuring 4-40 threaded inserts or female screwlocks (pages 85-91, 96, 97, 102, 103 and 108).

4. Retaining clips must be assembled onto connector flanges with threaded hole toward wire side of connector.

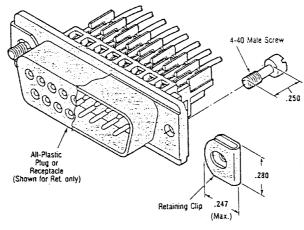

#### Material and Finish

Male Screw-Steel, zinc plated clear or yellow chromate Retaining Clip—.012 steel, zinc plated or stainless steel\*\*

#### Related Product Data:

\*Each part is individually bulk packed for multiple kit orders.
\*\*With captivated star washer. No additional hardware included.

Notes: 1. All parts are packaged unassembled.

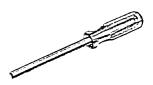

2. Each female screwlock kit is comprised of two assemblies as illustrated above.
3. One or two flat washers may be required for panel thicknesses less than .060. Female screwlocks are not recommended for One or two flat washers may be required for panel uncorresses less than 1000, i children panel thicknesses greater than 1060.
 2-56 is the male thread size. The female thread size is 4-40.
 Female screwlocks with 2-56 thread size are to be used with cable clamps with mounting flanges. Female screwlocks with 4-40 and M3 (metric) thread sizes can be used with all other cable clamps.
 Female screwlocks mate with male screw retainers (pages 59 & 60).
 Short female screwlocks cannot be used with HDF connectors.

# Material and Finish:

All Parts—Cold rolled steel, zinc plated clear or yellow chromate

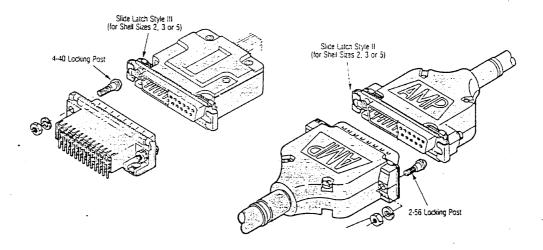

# Related Product Data:

Connectors used with: HDE Metal-Shell or All-Plasticpages 14-16 HDF Metal-Shell or All-Plastic pages 24 & 25 HDP Metal-Shell—pages 8, 9, 30 & 31 HD Metal-Shell—pages 82-91, 96, 97, 100-103 & 108 HD All-Plastic—pages 92-95, 104-107 & 109 Technical Documents pages 114 & 115

Nut Driver, Part No. 811262-1 (Used for assembling female screwlocks to connector flange)

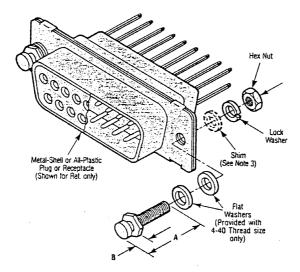

#### Locking Posts and Slide Latches

Typical Applications of Locking Posts and Slide Latches

# **Locking Posts**

Accessories

Thread	Locking Post	Dimen	sions	Locking Post Kit Number (See Note 4)		
Size	Finish	Α	8	Individual	Bulk Packed	
4-40	Yellow	.410	.110	206514-1	206514-3	
4-40	Chromate	.560	.110	206514-6	206514-7	
2-56	Yellow Chromate	.615	.172	747242-1	747242-2	
2-50	Clear Chromate	.615	.172	747242-3	747242-4	

\*Each part is individually bulk packed for multiple kit orders.

Notes: 1. All parts are packaged unassembled.
2. Each kit is comprised of two complete assemblies, as illustrated above.

For front panel mounting, it is recommended that a shim be used between the connector flange and panel to prevent bowing of the flange.

Locking posts with 2-56 thread size are to be used with cable clamps with mounting flanges. Locking posts with 4-40 thread size can be used with all other cable clamps

5. Locking posts mate with slide latches (page 63).

# Material and Finish:

All Parts—Cold rolled steel, zinc plated clear or yellow chromate

"Individual kits contain two latching blocks per package.

Notes: 1. Mounting screws and nuts are to be supplied by Customer.
2. These latching blocks allow mounting screws to be installed thru the front of the block and to be screwed into the bracket of a right-angle connector, a fixed insert in a connector mounting flange, or a nut behind the connector mounting flange (as illustrated above).

3. Latching blocks mate with spring latches (pages 64 & 65).

Typical Application of Front-Panel Mounted Subminiature D Connector using Front-Panel Latching Blocks

Typical Application of Rear-Panel Mounted Subminiature D Connector using Rear-Panel Latching Blocks

Material:

Latching Blocks—Zinc

# Straight/90° Exit

Straight Cable Exit Application

90° Cable Exit Application

Typical Cable Support Gate (Supplied with Cable Clamp Kit)

Shell	Cable Clamp	Dimensions		Cable	Cable Clamp Kit No.		
Size	Configuration	Α	В	Dia.	Individual	Bulk Packed	
3	Straight Exit	1.906	1.672		7.5000		
3	90° Exit	2.066	1.396	.550	745306-1	745306-2	
4	Straight Exit	2.424	1.820	750	745044.4		
	90° Exit	2.638	1.596	.750	745311-1	745311-2	

\*Each part is individually bulk packed for multiple kit orders.

Notes: 1. All parts are packaged unassembled.

Each cable clamp assembly includes a yoke, male panel, female panel and four cable support gates. The cable diameter is adjustable by changing the cable support gates.

Straight/90° Exit Cable Clamps can be used on a plug or receptacle and will not interfere with commonly used mating hardware. Their three-piece construction allows easy assembly to a cable harness. Also, the same cable clamp components are used for both straight and 90° cable exit applications. This is accomplished by simply positioning the Male and Female Panels on the Yoke for the desired angle.

<sup>\*</sup>For split-ring ferrules, Min. O.D. is .040 smaller than Max. O.D. For inner and outer ferrules, Min. O.D. is .050 smaller than Max. O.D. At the Max. cable O.D. the Min. insulation thickness is .060.

# Shielded Cable Clamps

For drawings, technical data or samples, contact your AMP sales engineer or call the AMP Product Information Center 1-800-522-6752.

# Universal Cable Clamp For Jacketed Cable

For Shell Size 3 Individual Kit No. - 748665-1 Bulk Packed Kit No. - 748665-2\*

\*Each part is individually bulk packed for multiple assembly orders.

Notes: 1. All parts are packaged unassembled.
2. Each kit is comprised of two cable clamp halves, two cable clamp wedge sets, one braid termination clamp set and two mounting screws.

# Material and Finish:

Cable Clamp Housing-Thermoplastic, plated nickel over copper

Cable Clamp Wedge Set-Thermoplastic, black

Braid Termination Clamp Set-Thermoplastic, plated nickel over copper

4-40 Mounting Screws-Steel, zinc plated

# Subminiature D HD-22 and HD-20 Cable Connectors

#### Introduction

Cable connectors come in insulation-displacement, crimp and solder cup versions.

Because of their masstermination ability, insulation-displacement contacts offer the lowest applied costs. Pressing the wires into slotted-beam contacts displaces the insulation to form a gastight connection on the conductors. No wire stripping or other preparation is needed, so application is fast and efficient.

Two types of IDC connectors are offered. The HDE series handles discrete wire in the 20 to 30 AWG range. Wire entry is straight into the rear of the connector.

The HDF series mass terminates .050 inch center ribbon cable, accepting wire of 30 AWG solid, 28 AWG solid or stranded and 26 AWG solid or stranded. To provide a very low profile, wire entry is at right angles. Unlike most cable connectors, which are used externally to the equipment, HDF connectors are used internally to carry signals from a pc board to the skin.

Crimp snap-in contact connectors easily answer any production need by offering the benefits of low applied cost and widely available termination equipment, from hand tools to high-speed automatic

harness makers.
Connectors can be selectively loaded, meaning you don't pay for contacts in unused positions. Contacts are available for wire sizes in the 18 to 28 AWG range for HDP-20 connectors and the 22 to 28 AWG range for HDP-22 connectors.

HDP-20 solder cup connectors are preloaded with solder cup contacts. These contacts handle a full range of wire sizes 20 AWG and smaller.
