

310-2683

Next Two's metal horn loudspeakers are manufactured in robust spun aluminium and are designed for heavy-duty industrial use. They are coated in a tough, grey epoxy finish. Switchable tapings allow the installer to adjust sound pressure levels without rewiring.

Suitable for both indoor and outdoor use, these compact re-entrant horns provide high sensitivity combined with a tightly controlled dispersion pattern.

The AR-15 and AR-30 come complete with a 20mm weatherproof gland entry plate. The AR-10 is supplied with a 300mm flying lead.
