

**VF1 and VF5 Series Mini
Surface Mount Tri-State
HCMOS Compatible
Hybrid Crystal Clock Oscillator**

Valpey-Fisher's VF1 and VF5 series of oscillators are the smallest surface mounted oscillators available anywhere. At 7.5 mm in length and 5.0 mm in width they take up only approximately half of the board space of Valpey-Fisher's subminiature oscillator and approximately one quarter of the board space of industry standard miniature surface mount oscillators. Their mini size makes them ideal for applications in such compact, portable devices as small video cameras or disk drives.

The VF1 series has a frequency range of 1.8432MHz to 50.0MHz and drives 10 LS-TTL gates. The VF5 series has a frequency range of 1.8432MHz to 67.0MHz and drives 10 N-TTL gates.
