

OUTLINE OF SYSTEM

KIC9321F-008 is a C-MOS LSI designed for a FM/MW/LW radio of a PLL frequency synthesizer system corresponded to the requirement of the whole world.

This digital tuning system is optimum for such car audio equipment as three band radio with detachable panel.

- PLL + controller : KIC9321F-008 (QFP-60 Pin)
- LCD driver can control condition of key. : KIC9297F (QFP-60Pin)
- Electronic volume : KIC9421F

RECEIVING BAND

AREA			BAND	RECEIVING FREQ. (Hz)	STEP (Hz)	f_{ref} (Hz)	IF (Hz)

0	1	LW ENABLE	153 k ~ 279 k	1k	9k	1k	+450k /+459k
1	0		144 k ~ 288 k				
1	1		146 k ~ 290/288 k				

KIC9321F-008

OUTLINE OF FUNCTION

(1) TUNING FUNCTION

- MANUAL TUNING (UP/DOWN)
- SEEK TUNING (UP/DOWN)
- SCAN TUNING (UP/DOWN)
- AUTO MEMORY TUNING
- PRESET MEMORY SCAN

(2) MEMORY FUNCTION

- FM1/FM2/FM3 : MAX 18 STATIONS
- MW1/MW2 : MAX 12 STATIONS
- LW : 6 STATIONS
- Maximum 42 stations in total.
- Each band has a last memory.

(3) RADIO FUNCTION

- LOC/DX control (AUTO LOCAL FUNCTION select possible)
- STEREO DISPLAY and MONO/STEREO select
- RADIO MONITOR FUNCTION

(4) TAPE FUNCTION

- "TAPE" DISPLAY
- METAL/NORMAL select
- APS ON/OFF control
- DNR ON/OFF and B/C select
- TAPE RUNNING DISPLAY (| > / < |)

(5) ELECTRONIC VOLUME / INPUT SELECT FUNCTION

- VOLUME / BASS / TREBLE / BALANCE / FADER
- LOUDNESS CONTROL
- RADIO / TAPE / CD INPUT
- MUTE FUNCTION
- KIC9421F select

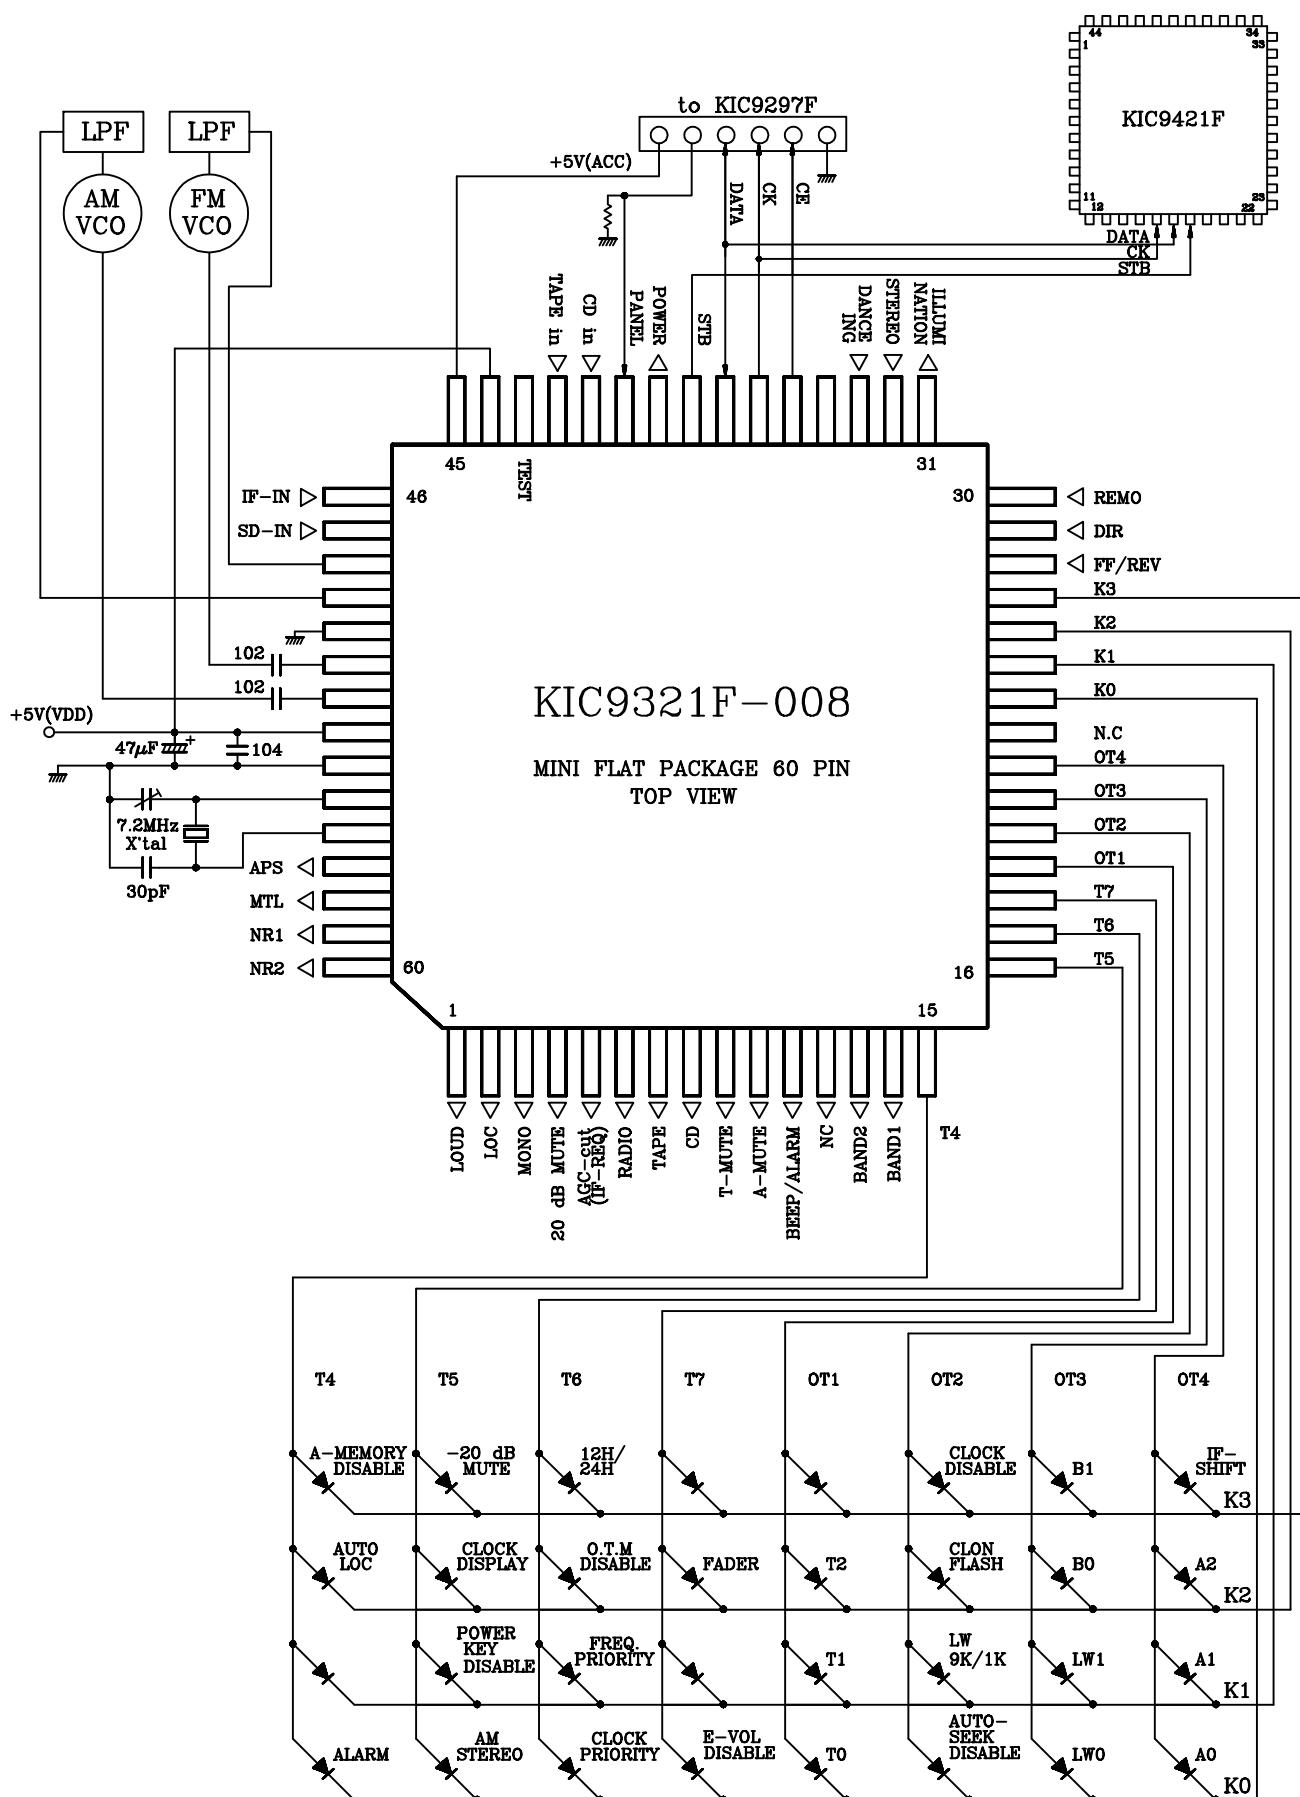

(6) CLOCK FUNCTION

- 12 hour display with "AM" and "PM" indicator or 24 hour display
- The colon display is possible to select flashing.

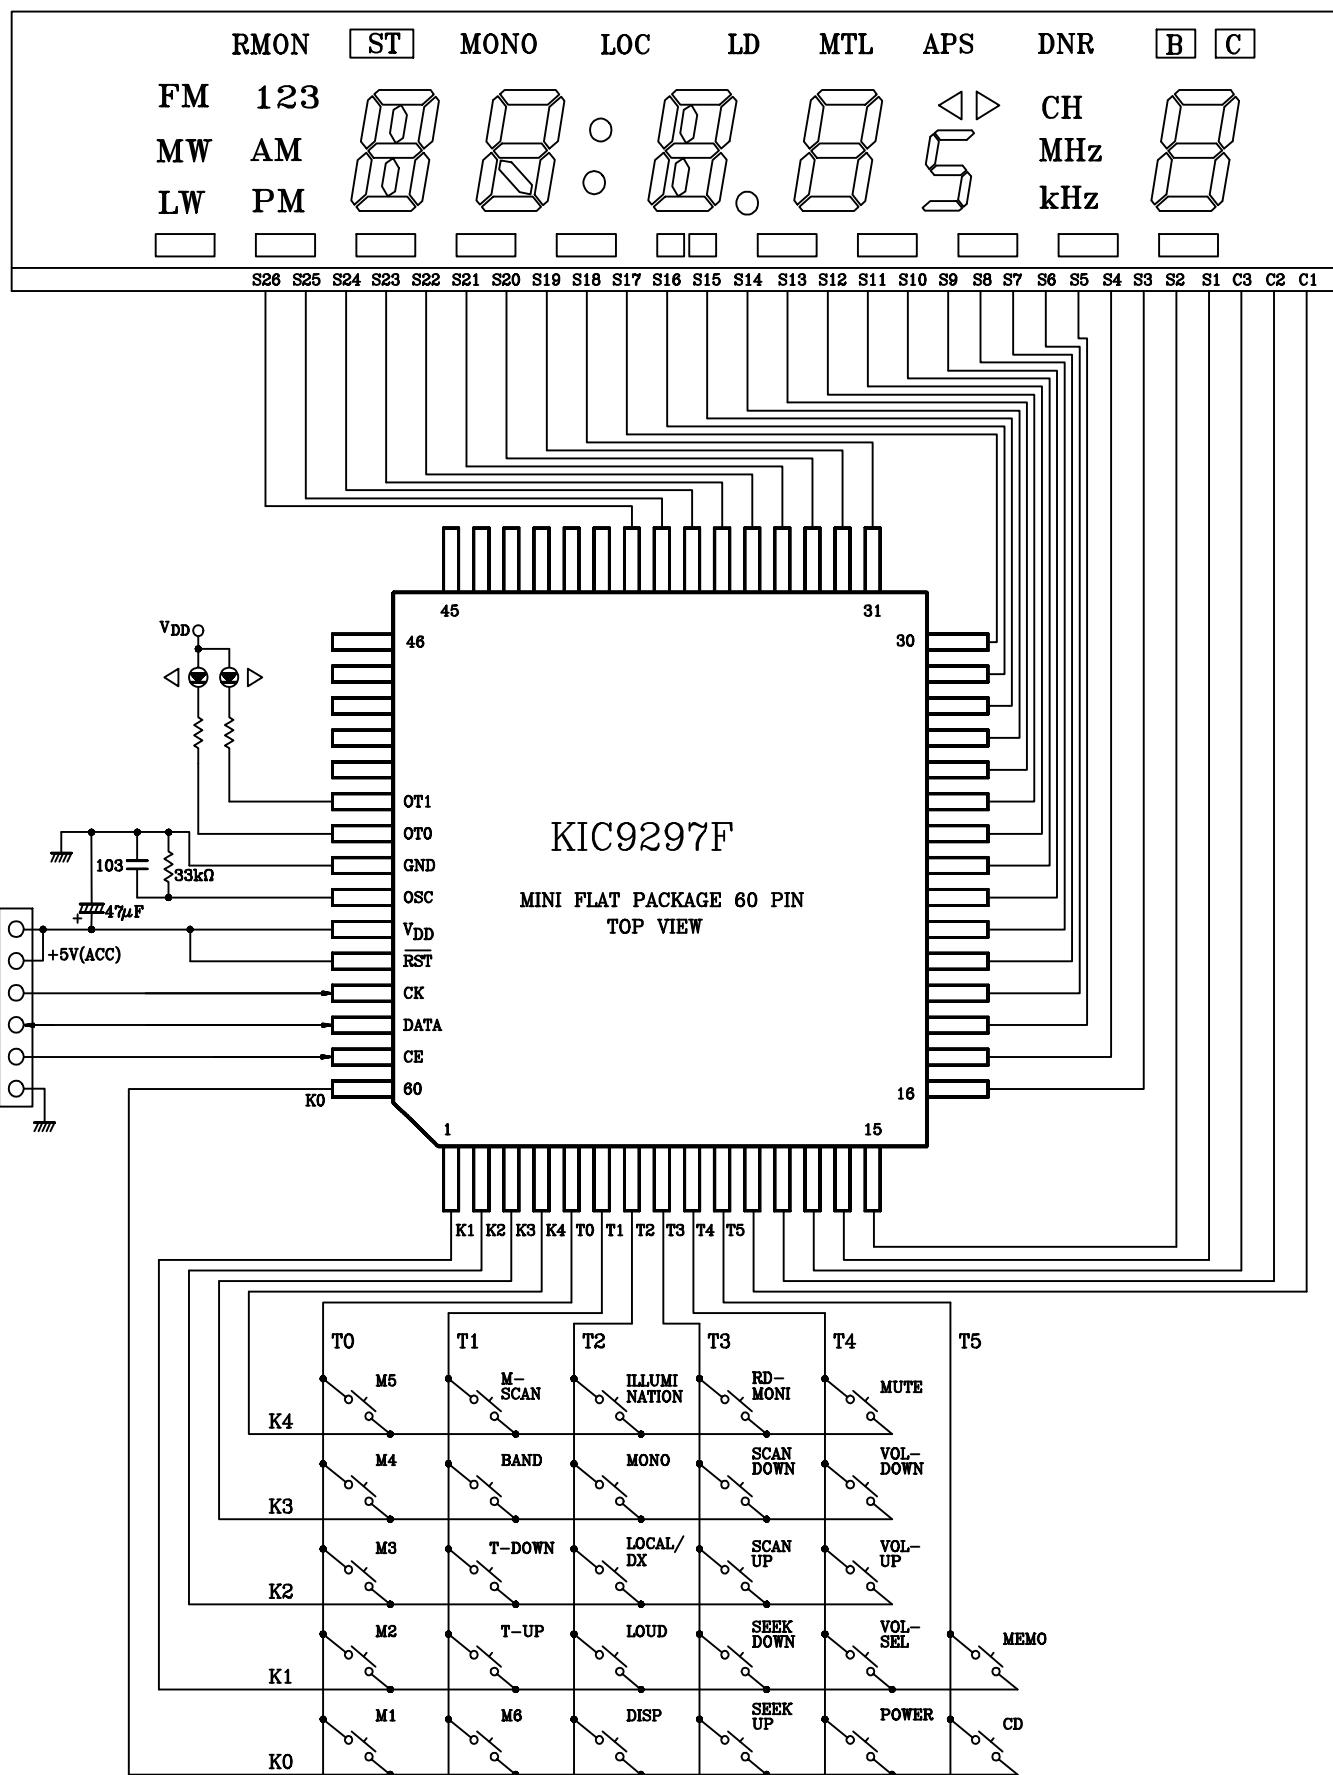

(7) OTHER FUNCTION

- CD input and "CD" display.
- Burglary prevention alarm.

* O.T.M = One Touch Memory

KIC9321F-008

KEY MATRIX FUNCTION EXPLANATION

SYMBOL	EXPLANATION OF FUNCTION
M1～M3	Calling and writing preset memory. (1～3ch)
M4 (APS)	In radio mode, calling and writing preset memory. (4～6ch) These keys are act as the tape function key in tape mode.
M5 (DNR/APS)	In each function, the mark on LCD is indicated and corresponding put outputs "H" level.
M6 (METAL/DNR)	The tape function key is set by jumper of [T0] , [T1] , [T2].
T-UP (MIN/ADJ)	The receiving frequency steps up or down by pushing this key. If key is pushed for more than 0.5 sec, frequency steps up continuously. In case of AUTO SEEK function, it becomes SEEK tuning.
T-DOWN (HOUR-ADJ)	During clock adjusting mode, hour or minute of clock is adjusted by pushing this key.
BAND	Changing the receiving band cyclically. Every pushing of this key, the band is changed as shown below. 
M-SCAN (A-MEMO)	The MEMORY SCAN function is started by pushing this key for less than 2 sec. The frequency written in memory is called in order. The station will be received for 5 sec. If this key pushed for more than 2sec, the AUTO MEMORY turning is started. The search turning is started from current frequency, and first cycle is execute at local mode, then the frequency is written in memory, if the station can be received at frequency. If the station can not be received at, second cycle is started DX mode.
DISPLAY	Changing displays of clock, frequency, or CD/TAPE. This function is invalid in clock disable mode.
LOUD	Used for turning ON/OFF of LOUDNESS. "H" is outputted from LOUDNESS output and the "LD" mark on LCD is indicated, when the LOUDNESS function turn ON. And electronic volume IC is controlled.
LOCAL /DX	Used for changing LOCAL/DX in radio mode. The local output outputs "H" during auto turning, and the LOC mark on LCD is indicated, when the LOCAL is selected. This function is invalid in auto LOCAL mode.

KIC9321F-008

SYMBOL	EXPLANATION OF FUNCTION
MONO	Changing STEREO/MONO in radio mode. The MONO output outputs "H", and the "MONO" mark on LCD is indicated, when MONO is selected. This function is valid in AM band when AM stereo mode is selected.
ILLUMINATION	Used for illumination ON/OFF. Every pushing of [ILLUMINATION] key, illumination output is changed "H"/"L"
SEEK UP/DOWN	Seek up/down tuning key. If the station is received, auto tuning is stopped. This function is invalid in auto seek mode.
SCAN UP/DOWN	Scan up/down tuning key. If the station is received, auto tuning is stopped for 5 sec. After 5 sec. auto tuning start again.
RADIO -MONI	During CD/TAPE, radio monitor can be executed. All radio function is valid in radio monitor mode. Radio monitor is clear for pushing [RADIO MONITOR] key again.
POWER	Used for power ON/OFF. Every pushing of [POWER] key, power output is changed "H"/"L". This function is invalid when power diode jumper is "0".
VOL-SEL	Changing volume mode cyclically. If key is pushed, mode is changed as shown below. Each mode returns to volume mode. if [VOL-SEL] key, [VOL-UP] key or [VOL-DOWN] key is not push for 5 sec, and display returns to frequency, clock, CD or TAPE. in case of fader diode = "1"  in case of fader diode = "0" 

KIC9321F-008

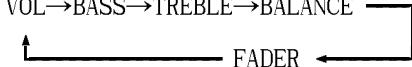

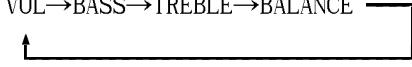

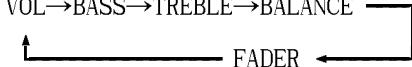

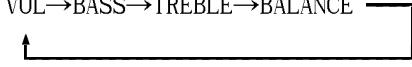

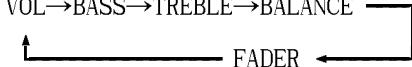

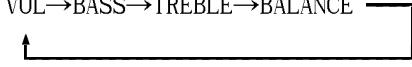

SYMBOL	EXPLANATION OF FUNCTION		
VOL-UP VOL-DOWN	Volume control key.		
	VOL-MODE	VOL-UP	VOL-DOWN
	VOLUME	UP	DOWN
	BASS		
	TREBLE	BOOST	CUT
	BALANCE	Lch-DOWN	Rch-DOWN
	FADER	FRONT-DOWN	REAR-DOWN
MUTE	Use for turning ON/OFF of volume mute. During volume mute, volume level indicator is flashed at 1 Hz. The volume mute is released by pushing [MUTE], [VOL-SEL], [VOL-UP] key or [VOL-DOWN] key.		
CD	Use for turning ON/OFF of CD mode. This function is valid when CD input is "H". During CD mode, display is indicated "CD" mark or "DISC" mark on LCD, and input selector is changed to CD input.		
MEMORY	When frequency is displayed, this key is used for setting of memory writing enable state. When clock is displayed, this key is used for setting of the clock adjusting enable state. Each enable state is clear after 5 sec, when the designated is not push for 5 sec. In case of O.T.M DISABLE jumper = "1", this function is valid.		

KIC9321F-008

DIODE MATRIX FUNCTION EXPLAIN (1 : diode set , 0 : diode not set)

SYMBOL	EXPLANATION OF FUNCTION																																																																		
A0, A1, A2 LW0, LW1	Setting the area of receiving station. Refer to receiving frequency list.																																																																		
IF-SHIFT	Select IF of AM band. 0 : MW/LW-IF = 450kHz 1 : MW/LW-IF = 459kHz																																																																		
B0, B1	Setting the number of memory bank. <table border="1" style="width: 100%; border-collapse: collapse;"> <tr> <td style="width: 25%;">B1</td> <td style="width: 25%;">B0</td> <td style="width: 25%;">FM</td> <td style="width: 25%;">MW</td> </tr> <tr> <td>0</td> <td>0</td> <td>FM 1 - 2 - 3</td> <td>MW 1-2</td> </tr> <tr> <td>0</td> <td>1</td> <td>FM 1 - 2 - 3</td> <td>MW 1</td> </tr> <tr> <td>1</td> <td>0</td> <td>FM 1 - 2</td> <td>MW 1</td> </tr> <tr> <td>1</td> <td>1</td> <td>FM1</td> <td>MW 1</td> </tr> </table>					B1	B0	FM	MW	0	0	FM 1 - 2 - 3	MW 1-2	0	1	FM 1 - 2 - 3	MW 1	1	0	FM 1 - 2	MW 1	1	1	FM1	MW 1

KIC9321F-008

L C D map

KIC9321F-008

REMOTE CONTROL

1. PRINCIPAL FUNCTION

Receiving the remote control data from the KIC9243P/F.

2. I/O TO BE USED

REMOCON INPUT

3. FUNCTIONS

- a. The transmitter IC is KIC9243P/F.
- b. The custom code for the remote control is "90".
- c. The key action that correspond to the remote control data is executed.
- d. The all radio related key is valid in the tuner mode.
However, the radio related key is invalid in the mode excepting the tuner mode.
- f. The valid key on transmitter in case power is off, if the [POWER] key.

KIC9321F-008

g. The Setting for the remote control data on the KIC9321F-008 is as shown below.

DATA	D0	D1	D2	D3	D4	D5	D6	D7	DTS KEY
K01	1	0	0	0	0	0	0	0	M1
K02	0	1	0	0	0				M2
