

# Thick film thermal printhead (with thermal historical control)

## KF3004-GM50A

GM50 series is the new product that newly added the future history control and driver LSI which has the function of thermal historical control, to GL50 series which is employing the conventional thick-film fast response thermal element.

### ● Applications

- High speed label printer
- High speed bar code printer
- High speed ticket printer
- Various high speed terminal printers

### ● Features

- 1) Newly developed thick-film fast response thermal element and driver LSI with the function of thermal history control which is added the future history control are employed for this series. It is possible to print with super high speed of 10 inches / s or 250 mm / s.
- 2) 150km life realized by attributing durable new protection film.
- 3) New partial glaze construction makes it compatible with the thermal transfer application.
- 4) Market-proven G-series printhead construction ensures high reliability.

### ● External dimensions (Units : mm)

## Printhead

## ● Equivalent circuit

DI,STB DIVISION DOT No. CORRESPONDENCE

DI No.	DOT No.
DI2	1280~641
DI1	640~ 1

/ STB No.	DOT No.
/ STB2	1280~641
/ STB1	640~ 1

CLK No.	DOT No.
CLKIN2	1280~641
CLKIN1	640~ 1

## ● Pin assignments

CONNECTOR A

No.	Circuit	No.	Circuit
1	V <sub>DD</sub>	11	/ RESET
2	V <sub>DD</sub>	12	START
3	SEL2	13	DO1
4	SEL1	14	DO2
5	CLKIN2 (CP)	15	TM
6	NC	16	TM
7	DI2	17	/ STB2
8	DI1	18	/ STB1
9	INC	19	CLKOUT2
10	/ LOAD	20	CLKIN1

CONNECTOR B

No.	Circuit
1	V <sub>H</sub> (COM)
2	V <sub>H</sub> (COM)
3	V <sub>H</sub> (COM)
4	GND
5	GND
6	GND

## Printhead

**●Characteristics**

Parameter	Symbol	Typical	Unit
Effective printing width	—	108.416	mm
Dot pitch	—	0.0847	mm
Total dot number	—	1280	dots
Average resistance value	R <sub>ave</sub>	1250	Ω
Applied voltage	V <sub>H</sub>	24	V
Applied power	P <sub>o</sub>	0.408	W/dot
Print cycle	SLT	0.41	ms
Pulse width	T <sub>ON</sub>	0.260	ms
Maximum number of dots energized simultaneously	—	1280	dots
Maximum clock frequency	—	8	MHz
Maximum roller diameter	—	φ20.0	mm
Running life / pulse life	—	150/(1×10 <sup>8</sup> )	km/pulses
Operating temperature	—	5~45	°C
