

# Moulded Disposable Dust Masks

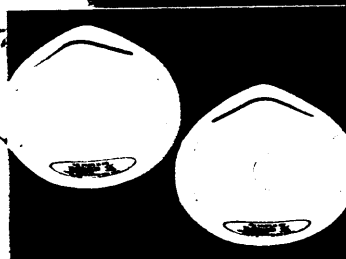

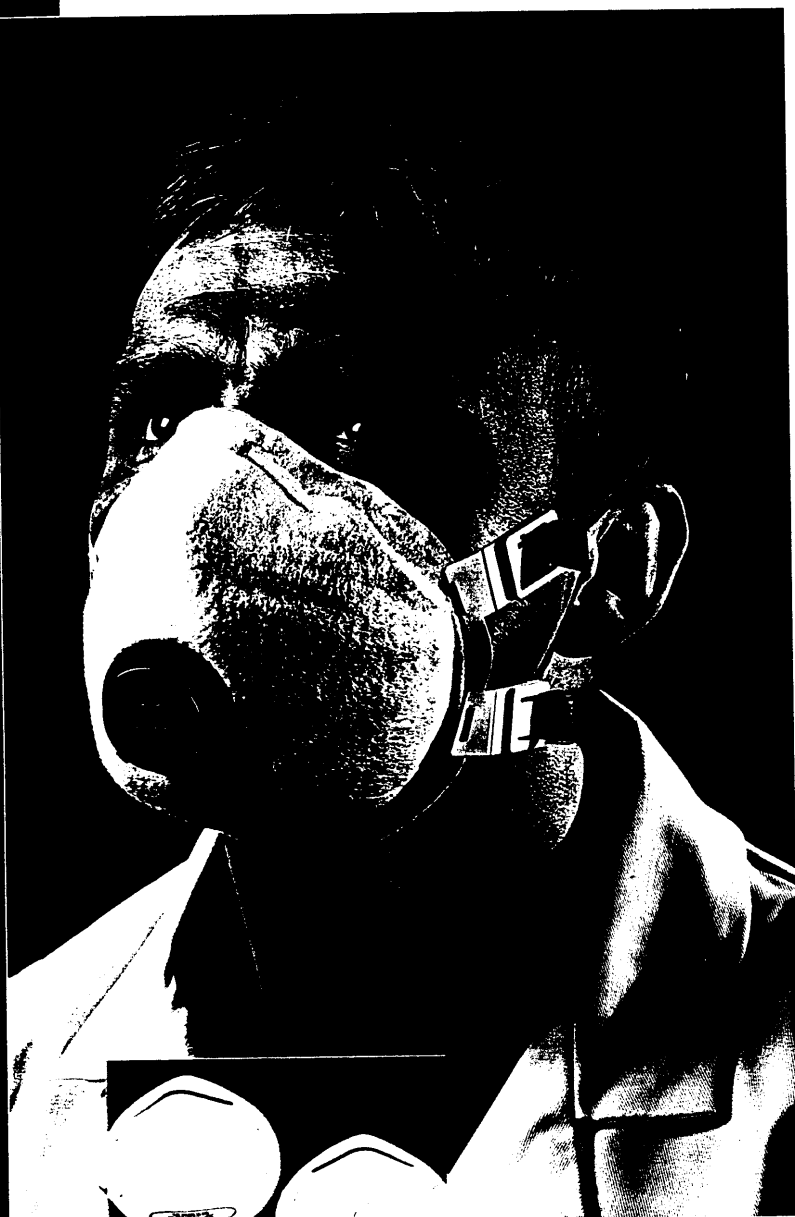

A range of masks designed to protect wearers against solid and liquid aerosols, dusts, powders and accompanying odours. All conform to the relevant European Standard EN149.

The products feature two designs. FFP1 and FFP2 utilise a traditional mask shape with or without valve and cover both S (Solid Aerosol) and SL (Solid and Liquid Aerosol) variants where applicable.

The new shape FFP3 mask design offers a maximum surface area. This minimises breathing resistance and maximises the dust carrying capacity. The FFP3 mask is shaped without the use of malleable nose clips. In addition, it has a 4-point suspension with integral elastic adjustment.

- Wide range of masks to protect against a variety of dusts, fumes and mists
- Hygienic and hypoallergenic for excellent protective performance
- Lightweight and comfortable to wear
- Highly efficient and completely reliable
- Produced from premium quality materials
- Elasticated head straps for perfect personal fit
- Extremely low breathing resistance for reduced wearer fatigue
- Compatible with other facial protection equipment
- Approved to EN 149
- International packaging with user instructions in seven languages

*Colour Valves:* FFP1 - White, FFP2 - Yellow, FFP3 (S) - Orange, FFP3 - (SL) Red

## ▲ FFP2 (S)

NPF: 12.5 x OES

- Fine toxic dusts, fibres and aqueous mists

Product Code: 2145211

Conforms to: EN 149

## ▲ FFP2 (S) valved

NPF: 12.5 x OES

- Fine toxic dusts, fibres and aqueous mists

Product Code: 2145221

Conforms to: EN 149

## ▲ FFP3 (SL) valved

NPF: 50 x OES

- Very fine toxic dusts, fibres and liquid based aerosols

Product Code: 2146321

Conforms to: EN 149

## ► FFP3 (S) valved

NPF: 50 x OES

- Very fine toxic dusts, fibres and aqueous mists

Product Code: 2145321

Conforms to: EN 149
