

FG-602S-T01

ERBIUM-DOPED FIBER AMPLIFIER

DESCRIPTION

Mitsubishi's FG-602S-T01 is an erbium-doped fiber amplifier (EDFA) used to directly amplify light at 1550nm.

The FG-602S-T01 uses two 1480nm lasers to optically pump an erbium-doped fiber, which acts as the gain media. The wavelength of the pump light is set for optimal absorption into the erbium-doped fiber by electronically controlling the temperature of the pump lasers. The FG-602S-T01 is sufficiently isolated to prevent reflection back to the user's external optical transmitter and to prevent stimulated emission (lasing) from occurring internally.

ABSOLUTE MAXIMUM RATINGS ($T_c = 25^\circ\text{C}$)

Parameter	Symbol	Rating			Unit
		Min.	Typ.	Max.	
Power supply	V _{CC}	0	—	-6	V
	V _{EE}	0	—	-6	V
Operating case temperature (Note 1)	T _c	0	25	60	°C
Storage temperature	T _{stg}	-40	—	70	°C
Soldering	Temperature	T _s	—	260	°C
	Time	t _s	—	10	sec.
Storage relative humidity (Note 2)	R _H	10	—	90	%

Note 1. The case never exceeds the maximum value specified above

2. Without condensation

FEATURES

- Flat gain profile from 1535nm to 1565nm
- High output power (> +15dBm)
- Low noise figure (6dB)
- Isolated input and output ports
- Wide operating temperature range
- Built in pump laser control circuit
- Built in shutdown circuit

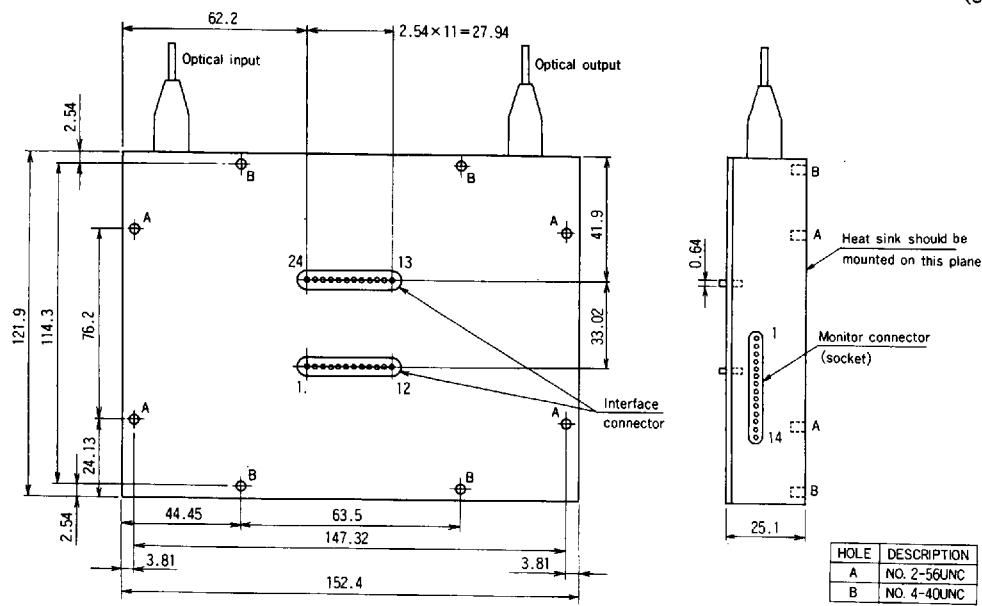

APPLICATION

Long-haul telecommunications

Analog transmission systems

CHARACTERISTICS (T_c = 25 °C, unless otherwise noted)

OPTICAL CHARACTERISTICS (Large Signal)

Parameter	Symbol	Test conditions	Limits			Unit
			Min.	Typ.	Max.	
Signal wavelength range	λ_{OP}	—	1535	1550	1565	nm
Input signal power	P _{in}	—	-5.5	—	—	dBm
Output signal power	P _{out}	—	15.0	—	—	dBm
Polarization sensitivity	$\Delta P_{out}/\Delta P$	All polarization	—	—	0.5	dB
Temperature sensitivity	$\Delta P_{out}/\Delta T$	T _c = 0 ~ + 60 °C	—	0.5	1.0	dB
Wavelength sensitivity	$\Delta P_{out}/\Delta \lambda$	P _{in} = -5.5dBm	—	1.0	1.5	dB

CHARACTERISTICS (T_c = 25 °C, unless otherwise noted)

OPTICAL CHARACTERISTICS (Small Signal)

Parameter	Symbol	Test conditions	Limits			Unit
			Min.	Typ.	Max.	
Signal wavelength range	λ_{OP}	—	1535	1550	1565	nm
Input signal power	P _{in}	—	-30	—	—	dBm
Gain	G	—	28	35	—	dBm
Noise figure	NF	—	—	6	9	dB
