

1 and 1.5 WATT DC/DC CONVERTERS

Key Features

- Compact DIP Package
- Input/Output Isolated
- No derating to +85° C
- Self-recovering short circuit protection
- LC Input Filter

Applications

- Telecommunications
- Industrial Controls
- Where space is at a premium

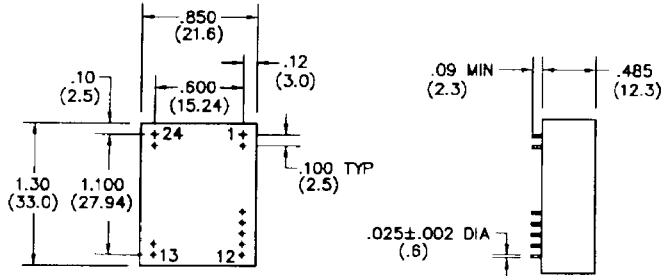

These 1 and 1.5 Watt DC/DC converters operate from a nominal 48v source and make available isolated single 5v and dual 5v outputs at the board level. The converters operate without derating over their full temperature range. Solid tantalum capacitors are used for enhanced reliability. Applications include telecommunications and industrial controls where space is at a premium.
