

LASER

A specialist range featuring the Cover All Laser Goggle, Laser Spectacle, Crystal Laser Eyeshield and Squall Laser Eyeshield. Each have soft special PVC/Alloy frames which are resistant to all laser beams and benefit from the new Bollé organic Polycarbonate filter which is 20 times stronger than hardened mineral glass, whilst far lighter and safer - yet practically unbreakable. In the event of overload, these new filters melt with a clearly audible sound, thereby warning the user in advance of the risk of danger, unlike mineral lenses which would simply shatter.

All Bollé laser protection is supplied with a carrying case.

Cover-All Laser Goggle
Case: BG-C (option)

Model 426 Laser Spectacle
Case: BG-C (option)

Squall Laser Eyeshield
Case: BG-SC (option)

Crystal Laser Eyeshield
Case: BG-SC (option)

AIR-FED VISOR

bollo

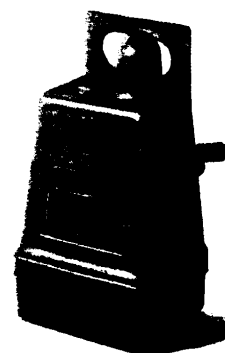

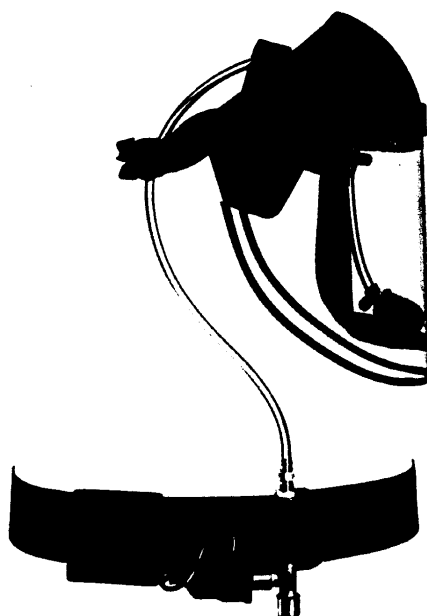

BOLLÉ-(SUPREME) AIR-FED VISOR

The Bollé-(Supreme) Air-Fed Visor protects against a variety of respiratory hazards such as gases, vapours, dust, mist and overspray by feeding fresh, clean air at positive pressure into the headset whilst providing high levels of impact and chemical splash protection. The head-set is lightweight and highly adjustable for comfort and the visor can be supplied in a number of different materials dependent on use. Includes a belt regulator. Various options available detailed on separate price list.
