Coaxial **Bandpass Filter**

8550 to 8750 MHz 50Ω

The Big Deal

- Low Insertion Loss (2.0 dB typical)
- · Good close-in rejection
- Versatile small size, coaxial, 1.43" length

VBF-8650+

CASE STYLE: FF704

Product Overview

The VBF-8650+ Band Pass Filter is constructed using internal LTCC Band Pass Filter structure to achieve repeatable performance. Covering 8650 MHz ±100 MHz, these units offer low insertion loss and good rejection at the band reject edges. Built using Mini-Circuits proven unibody construction which integrates the RF connectors with the case body, the VBF-8650+ takes very little space and meets rugged test lab system environment.

Key Features

Feature	Advantages	
Good Rejection close to pass band	Provides good rejection of signals close to the pass band, for improved system performance.	
Compact Versatile Case (1.43"x0.41")	Enables use in a variety of applications including space constrained connectorized systems. Connectors: SMA Female (1), SMA Male (1)	
Rugged Unibody Construction	Mini-Circuits Unibody construction allows survivability in critical applications including milita- rized or industrial systems.
