- No external component ,needn't "ZERO"and "adj" adjustment.
- Three-port (power/input/output) isolation:3000VDC
- Assistant power:5VDC/12VDC/15VDC/24VDC
- 0-75mV/0-2.5V/0-5V/0-10V voltage signal or 0-10mA/0-20mA/4-20mA current signal isolation and transfer
- Temperature range: -45~+85 °C
- In EMC(electromagnetism disturb) circumstance need adopt shield measure.

Applications:

- DC current/voltage signal isolated/transfer/amplifier
- No distortion in long distance signal transmission
- Analog signal data acquisition
- 4-20mA(0-20mA)/0-5V signal isolation and transfer
- Equipment and sensor signal acquisition
- Signal transmit no-distortion
- Electric power,distant control,isolated safe bar
- 4-20mA sensor analog signal transmission
- Ground interference control

Specification:

SUNYUAN ISOEM series is electromagnetic isolation mixed IC,it is made of isolated DC/DC converters and electromagnetic isolation signal amplifier,it is ideally suited for no special need about EMC(electromagnetism disturb) Compare to photoelectrical isolation,it can not be used in strong electromagnetism,so clients need adopt shield measures,it can reach 5000VDC insulated. Sunyuan ISO EM series it is very easy to use,no external components are required.

★ Products style:weldable to PCB directly and DIN 35 1x2 or DIN35 2x2 Rail-Mounted

★ 0-5V/0-10V/0-75mV/0-2.5V/0-1mA/0-10mA/0-20mA/4-20mA isolated signal of international standard signal input and output

Accuracy grade:0.1/0.2,Extremely high linearity in whole process(non-linearity<0.1%), needn't "ZERO"and "adj" adjustment..

★ Input port isolated power can supply the power to two wires sensor(no-power),also used in input signal former amplify,difference,benchmark etc. circuit.
