

# Tuffy II® Liquid Level Controls with Electric Switches

#### DESCRIPTION

The Tuffy® II Liquid Level Switches are float-actuated devices designed for horizontal mounting in a tank or vessel through threaded or flanged pipe connections. The compact size allows for installation in small vessels, while its many features provide a variety of application uses. The single switch mechanism is available in SPDT or DPDT forms on units designed for fixed or adjustable, narrow or wide differential and interface service levels. This sales literature covers Tuffy II level switches that have electric switches. For Tuffy with a pneumatic switch, see bulletin 44-109.

#### TECHNOLOGY

The Tuffy II achieves switching action through the use of a magnetic switch mechanism and a magnet attached to the float assembly. Separating the two magnets is a nonmagnetic pressure barrier.

As the liquid level changes, the float, and therefore the float magnet, moves. The float and switch magnets repel each other causing movement of the switch magnet assembly, tripping the switch and making or breaking an electrical circuit.

#### FEATURES

- Pressure ratings to 2625 psi (181 bar)
- Process temperatures to +750° F (+399° C)
- · Cost-effective clad flange design option
- NACE and/or ASME B31.3 construction
- Specific gravity as low as 0.40

#### APPLICATIONS

- Sour service (NACE)
- High/low alarm
- Single pump control
- Day storage tanks
- Corrosive processes (Hastelloy® C wetted parts)
- Process vessels
- Boiler low water cut-off
- Interface level
- Explosion proof installations

#### ADDITIONAL FEATURES

- Carbon steel with 316 SS, all 316 SS or all Hastelloy C wetted components
- Enlarged switch enclosure for wiring ease
- Explosion proof NEMA 4X/7/9 enclosure
- All models available with FM, CSA and ATEX approvals
- Choice of cast aluminum or cast iron switch enclosure
- Interface service with 0.10 minimum specific gravity difference
- External cages available in carbon steel and 316 stainless steel

- Fixed narrow differential models
- Adjustable wide differential models
- Wide selection of process connections:

2" NPT

3" to 6" ANSI flanges

ANSI flanges pressure classes from 150# to 900#

• Wide selection of switches:

SPDT or DPDT

Silver or gold contacts

Dry contact

Hermetically sealed

# PHYSICAL SPECIFICATIONS

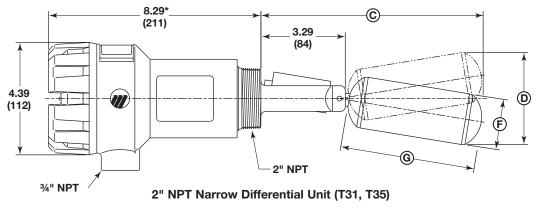

| Measured Variable:   | Liquid level                           |                                   |  |  |

#### Special conditions for safe use:

- ① When the equipment is installed, particular precautions must be take to ensure, taking into account the effect of the process temperature, that the ambient temperature of the electrical parts is between -40° and +70° C.
- ② When the material is equipped with a aluminum enclosure, all precautions shall be taken to avoid all impacts or frictions which can result in the ignition of the potentially explosive atmosphere.

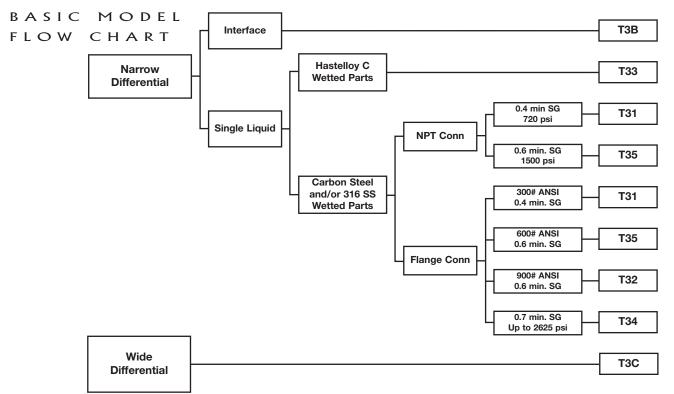

#### MODEL NUMBERS

Narrow Differential: Switch differential of approximately 0.5" (1.7" on interface unit), for actuation of an alarm or system shutdown.

Interface Service: Switch to detect the interface between two liquids with SGUs that differ by at least 0.1.

Single Liquid: Switch to detect the top of layer of a single liquid with no other liquid above it.

**Adjustable Differential:** Wide switch differential from approximately 1.36" to 18.26", which may be adjusted in the field by repositioning pins on the adjustment plate.

# STANDARD NARROW DIFFERENTIAL

#### MODEL NUMBER

Models available for quick shipment, usually within one week after factory receipt of a complete purchase order, through the Expedite Ship Plan (ESP).

The quality assurance system in place at Magnetrol guarantees the highest level of quality throughout the company. Magnetrol is committed to providing full customer satisfaction both in quality products and quality service.

Magnetrol's quality assurance system is registered to ISO 9001 affirming its commitment to known international quality standards providing the strongest assurance of product/service quality available.

# E S P

# E<sub>xpedite</sub> S<sub>hip</sub> P<sub>lan</sub>

Several Tuffy II Float Level Switches are available for quick shipment, usually within one week after factory receipt of a purchase order, through the Expedite Ship Plan (ESP).

To take advantage of ESP, match the color coded model number codes in the selection charts (standard dimensions apply).

ESP service may not apply to orders of ten units or more. Contact your local representative for lead times on larger volume orders, as well as other products and options.

#### WARRANTY

All Magnetrol mechanical level and flow controls are warranted free of defects in materials or workmanship for five full years from the date of original factory shipment.

If returned within the warranty period; and, upon factory inspection of the control, the cause of the claim is determined to be covered under the warranty; then, Magnetrol will repair or replace the control at no cost to the purchaser (or owner) other than transportation.

Magnetrol shall not be liable for misapplication, labor claims, direct or consequential damage or expense arising from the installation or use of equipment. There are no other warranties expressed or implied, except special written warranties covering some Magnetrol products.
