0.4 mm Pitch, Space-saving Interface Connectors

GX Series

Overview

Developed as input/output connectors for use in portable devices requiring reliable high durability connection.

■Features

1. Small size

With a width of 5 mm and 2.4 mm height above the mounting surface the connectors may be used in applications where board and volume space is restricted.

2. Strong construction

Single piece shell increases the board retention and resists rotational forces encountered in demanding consumer environment

3. High durability

Unique lock latches will maintain high retention force (plug with corresponding receptacle) up to 10,000 cycles, confirming fully mated condition with a distinctive tactile "click" sensation.

4. ESD protection

Increased distance from the edge of the metal shell to the front of the contacts offers circuit protection from electrostatic discharge.

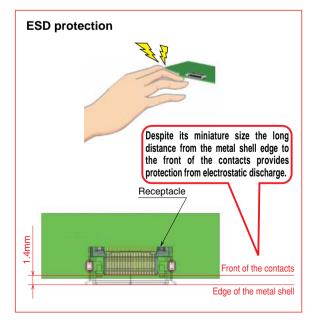

5. RoHS compliant

All components and materials comply with the requirements of EU Directive 2002/95/EC

■Applications

DSC, PDA, notebook computers, mobile phones and other portable devices requiring high durability interface connectors.
