## LV56831P — Monolithic Linear IC For Car Audio Systems Multi Voltage Regulator IC

### Overview

The LV56831P has 4 system regulator,  $V_{DD}$  5V(3.3V), AUDIO(8.5V), AMP remote(12V) and REG(3.3V/5V select). About protection circuits, it has Over-current-protection, Over-voltage-protection and Thermal-shut-down. AMP remote and REG supply is independent terminal from  $V_{CC}$ .

### Features

- 4 system regulator
  - $V_{DD}$ (LCD micon) :  $V_{OUT}$  5.0V(3.3V),  $I_O$  max 300mA, reverse current prevention.
  - Audio :  $V_{OUT}$  8.5V,  $I_O$  max 400mA
  - AMP remote :  $V_{OUT}$  12V,  $I_O$  max 500mA
  - REG3.3/5V :  $V_{OUT}$  3.3V(5V),  $I_O$  max 500mA
- Over-current-protection
- Thermal-shut-down Typ 175°C
- Over-voltage-protection: Typ 21V(except  $V_{DD}$ )
- Applied Pch-LDMOS for output stages.

(Warning)The protector functions only improve the IC's tolerance and they do not guarantee the safety of the IC if used under the conditions out of safety range or ratings. Use of the IC such as use under overcurrent protection range or thermal shut down state may degrade the IC's reliability and eventually damage the IC.

### Specifications

**Absolute Maximum Ratings** at  $T_a = 25^\circ\text{C}$

Parameter	Conditions	Conditions	Ratings	Unit
Supply voltage	$V_{CC}$ max		36	V
Allowable Power dissipation	Pd max (* $T_a \leq 25^\circ\text{C}$ )	IC unit	1.3	W
		With Al heatsink(50×50×1.5mm <sup>3</sup> )	5.3	W
		Infinite heat radiation	26	W
Peak supply voltage	$V_{CC}$ peak	See below pulse wave.	50	V
Operating ambient temperature	Topr		-40 to +85	°C
Storage temperature	Tstg		-55 to +150	°C
Junction temperature	Tj max		150	°C

■ Any and all SANYO Semiconductor Co.,Ltd. products described or contained herein are, with regard to "standard application", intended for the use as general electronics equipment. The products mentioned herein shall not be intended for use for any "special application" (medical equipment whose purpose is to sustain life, aerospace instrument, nuclear control device, burning appliances, transportation machine, traffic signal system, safety equipment etc.) that shall require extremely high level of reliability and can directly threaten human lives in case of failure or malfunction of the product or may cause harm to human bodies, nor shall they grant any guarantee thereof. If you should intend to use our products for new introduction or other application different from current conditions on the usage of automotive device, communication device, office equipment, industrial equipment etc. , please consult with us about usage condition (temperature, operation time etc.) prior to the intended use. If there is no consultation or inquiry before the intended use, our customer shall be solely responsible for the use.

■ Specifications of any and all SANYO Semiconductor Co.,Ltd. products described or contained herein stipulate the performance, characteristics, and functions of the described products in the independent state, and are not guarantees of the performance, characteristics, and functions of the described products as mounted in the customer's products or equipment. To verify symptoms and states that cannot be evaluated in an independent device, the customer should always evaluate and test devices mounted in the customer's products or equipment.

## Peak voltage testing pulse wave

## Recommended Operating condition at $T_a = 25^\circ\text{C}$

Parameter	Conditions	Ratings	Unit
Power supply voltage rating 1	$V_{DD}$ output(5V/3.3V)	7 to 16	V
Power supply voltage rating 2	REG output(5V/3.3V): $V_{CC}=V_{CC1}$	7 to 16	V
Power supply voltage rating 3	AUDIO output	11 to 16	V
Power supply voltage rating 4	AMP remote output: $V_{CC}=V_{CC1}$	13 to 16	V

## Electrical Characteristics at $T_a = 25^\circ\text{C}$ , $V_{CC} = V_{CC1} = 14.4\text{V}$ (\*1)

Parameter	Symbol	Conditions	Ratings			Unit
			min	typ	max	
Quiescent current	$I_{CC}$	$V_{DD}$ no load, ALL EN terminal = [L]		50	100	$\mu\text{A}$
<b>AUDIO_EN Input</b>						
Low input voltage	$V_{IL1}$		0		0.5	V
High input voltage	$V_{IH1}$		2.0		5.5	V
Input impedance	$R_{IH1}$		280	400	520	$\text{k}\Omega$
<b>AMP_EN Input</b>						
Low input voltage	$V_{IL2}$		0		0.5	V
High input voltage	$V_{IH2}$		2.0		5.5	V
Input impedance	$R_{IH2}$		280	400	520	$\text{k}\Omega$
<b>REG_EN input</b>						
Low input voltage	$V_{IL3}$		0		0.5	V
High input voltage	$V_{IH3}$		2.0		5.5	V
Input impedance	$R_{IH3}$		280	400	520	$\text{k}\Omega$
<b><math>V_{DD}</math> (5V/3.3V)output(reverse current prevention diode implemented)</b>						
$V_{DD}$ output voltage 1	$V_{O11}$	$I_{O11} = 200\text{mA}$ , $IKV_{DD}$ is connected to 5PIN.	4.75	5.0	5.25	V
$V_{DD}$ output current 1	$I_{O11}$	$V_{O11} \geq 4.7\text{V}$	300			mA
$V_{DD}$ output voltage 2	$V_{O12}$	$I_{O12} = 200\text{mA}$ , $IKV_{DD} = \text{GND}$	3.13	3.3	3.47	V
$V_{DD}$ output current 2	$I_{O12}$	$V_{O12} \geq 3.1\text{V}$	300			mA
Line regulation	$\Delta V_{OLN1}$	$7\text{V} < V_{CC} < 16\text{V}$ , $I_{O1} = 200\text{mA}$		50	100	mV
Load regulation	$\Delta V_{OLD1}$	$1\text{mA} < I_{O11}, I_{O12} < 200\text{mA}$		80	150	mV
Dropout voltage 1	$V_{DROP1}$	$I_{O1} = 200\text{mA}$ (implemented diode)		1.5	2.5	V
$V_{CC}$ ripple rejection	$R_{REJ1}$	$f=120\text{Hz}$ , $I_{O1}=200\text{mA}$	40(*2)	50(*2)		dB
$V_{DD}$ reverse current	$I_{REV}$	$V_{O11}=5.0\text{V}$ , $V_{CC}=0\text{V}$		10	100	$\mu\text{A}$
<b>AMP remote output ; AMP_EN = High</b>						
USB output voltage 1	$V_{O2}$	$I_{O2} = 400\text{mA}$	11.4	12	12.6	V
USB output current 1	$I_{O2}$	$V_{O2} \geq 11.3\text{V}$	500			mA
Line regulation	$\Delta V_{OLN2}$	$13\text{V} < V_{CC1} < 16\text{V}$ , $I_{O2} = 400\text{mA}$		50	100	mV

## Timing Chart

HZIP15 Heat sink attachment

Heat sinks are used to lower the semiconductor device junction temperature by leading the heat generated by the device to the outer environment and dissipating that heat.

- a. Unless otherwise specified, for power ICs with tabs and power ICs with attached heat sinks, solder must not be applied to the heat sink or tabs.

b. Heat sink attachment

- Use flat-head screws to attach heat sinks.
- Use also washer to protect the package.
- Use tightening torques in the ranges 39-59Ncm(4-6kgcm) .
- If tapping screws are used, do not use screws with a diameter larger than the holes in the semiconductor device itself.
- Do not make gap, dust, or other contaminants to get between the semiconductor device and the tab or heat sink.
- Take care a position of via hole .
- Do not allow dirt, dust, or other contaminants to get between the semiconductor device and the tab or heat sink.
- Verify that there are no press burrs or screw-hole burrs on the heat sink.
- Warping in heat sinks and printed circuit boards must be no more than 0.05 mm between screw holes, for either concave or convex warping.
- Twisting must be limited to under 0.05 mm.
- Heat sink and semiconductor device are mounted in parallel.  
Take care of electric or compressed air drivers
- The speed of these torque wrenches should never exceed 700 rpm, and should typically be about 400 rpm.

c. Silicone grease

- Spread the silicone grease evenly when mounting heat sinks.
- Sanyo recommends YG-6260 (Momentive Performance Materials Japan LLC)

d. Mount

- First mount the heat sink on the semiconductor device, and then mount that assembly on the printed circuit board.
- When attaching a heat sink after mounting a semiconductor device into the printed circuit board, when tightening up a heat sink with the screw, the mechanical stress which is impossible to the semiconductor device and the pin doesn't hang.

e. When mounting the semiconductor device to the heat sink using jigs, etc.,

- Take care not to allow the device to ride onto the jig or positioning dowel.
- Design the jig so that no unreasonable mechanical stress is not applied to the semiconductor device.

f. Heat sink screw holes

- Be sure that chamfering and shear drop of heat sinks must not be larger than the diameter of screw head used.
- When using nuts, do not make the heat sink hole diameters larger than the diameter of the head of the screws used. A hole diameter about 15% larger than the diameter of the screw is desirable.
- When tap screws are used, be sure that the diameter of the holes in the heat sink are not too small. A diameter about 15% smaller than the diameter of the screw is desirable.

- g. There is a method to mount the semiconductor device to the heat sink by using a spring band. But this method is not recommended because of possible displacement due to fluctuation of the spring force with time or vibration.

- SANYO Semiconductor Co.,Ltd. assumes no responsibility for equipment failures that result from using products at values that exceed, even momentarily, rated values (such as maximum ratings, operating condition ranges, or other parameters) listed in products specifications of any and all SANYO Semiconductor Co.,Ltd. products described or contained herein.
- Regarding monolithic semiconductors, if you should intend to use this IC continuously under high temperature, high current, high voltage, or drastic temperature change, even if it is used within the range of absolute maximum ratings or operating conditions, there is a possibility of decrease reliability. Please contact us for a confirmation.
- SANYO Semiconductor Co.,Ltd. strives to supply high-quality high-reliability products, however, any and all semiconductor products fail or malfunction with some probability. It is possible that these probabilistic failures or malfunction could give rise to accidents or events that could endanger human lives, trouble that could give rise to smoke or fire, or accidents that could cause damage to other property. When designing equipment, adopt safety measures so that these kinds of accidents or events cannot occur. Such measures include but are not limited to protective circuits and error prevention circuits for safe design, redundant design, and structural design.
- In the event that any or all SANYO Semiconductor Co.,Ltd. products described or contained herein are controlled under any of applicable local export control laws and regulations, such products may require the export license from the authorities concerned in accordance with the above law.
- No part of this publication may be reproduced or transmitted in any form or by any means, electronic or mechanical, including photocopying and recording, or any information storage or retrieval system, or otherwise, without the prior written consent of SANYO Semiconductor Co.,Ltd.
- Any and all information described or contained herein are subject to change without notice due to product/technology improvement, etc. When designing equipment, refer to the "Delivery Specification" for the SANYO Semiconductor Co.,Ltd. product that you intend to use.
- Upon using the technical information or products described herein, neither warranty nor license shall be granted with regard to intellectual property rights or any other rights of SANYO Semiconductor Co.,Ltd. or any third party. SANYO Semiconductor Co.,Ltd. shall not be liable for any claim or suits with regard to a third party's intellectual property rights which has resulted from the use of the technical information and products mentioned above.

This catalog provides information as of May, 2012. Specifications and information herein are subject to change without notice.
