

## 36 way Centronics Cables

Click on image  
▼ to enlarge

The Centronics cables are commonly used for connection between a parallel printer and a switch box. Conversely, the plug to socket cable can be used to extend existing cables.

### Features:

- Available in both fully moulded and assembled (clip hood) versions
- Wired in a straight through, pin 1 to 1 configuration
- Fully tested assemblies manufactured using 36 core cable
- Multi-purpose cables for use on many current printers
