Industry Standard Tools

**Pro2000™
Tone &
Probe Kit**

Harris Pro2000 Tone Generator and Pro2000 Probe provide a system that works with all types of wire and cable, including twisted-pair, multiconductor cable, electrical wire, speaker wire, coaxial, alarm cable and LAN cable. Without making direct metallic contact with the conductor, the Pro2000 Probe provides precision tracing and identification of cable pairs. Designed to work together, the units can be safely stored in the handy pouch for easy access.

The Pro2000 Probe is an inductive tracer capable of identifying the signal from the Pro2000 Tone Generator through dry wall, wood and many other non-metallic material. Its specially-designed and highly sensitive durable tip provides exact identification of cable pair. High and low sensitivity selection helps to identify the trace tone, making it especially well suited for bundled wire environments. Lightweight and easy to use, the Pro2000 Probe has a jack for optional ear piece.

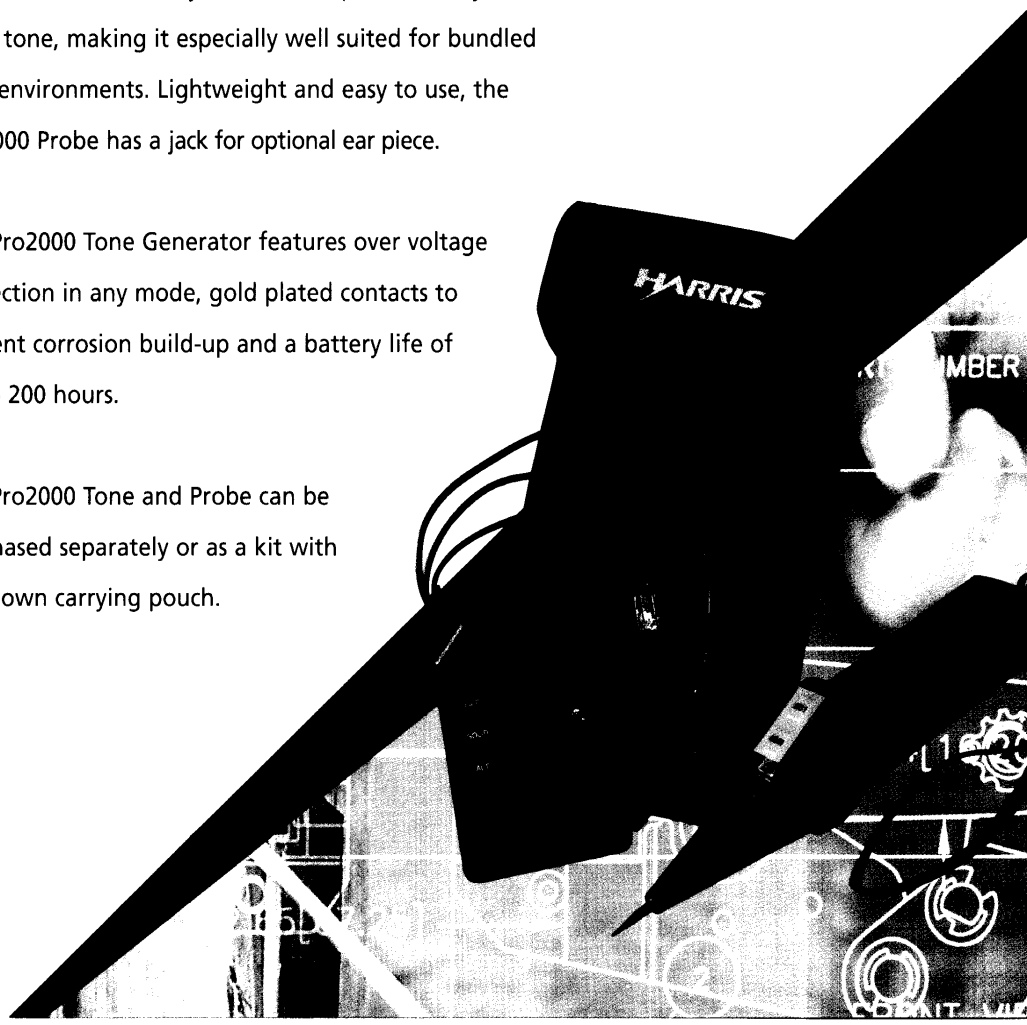

The Pro2000 Tone Generator features over voltage protection in any mode, gold plated contacts to prevent corrosion build-up and a battery life of up to 200 hours.

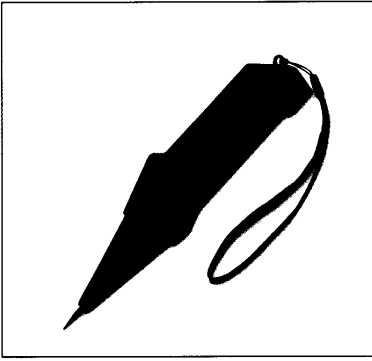

The Pro2000 Tone and Probe can be purchased separately or as a kit with their own carrying pouch.

New

next level solutions

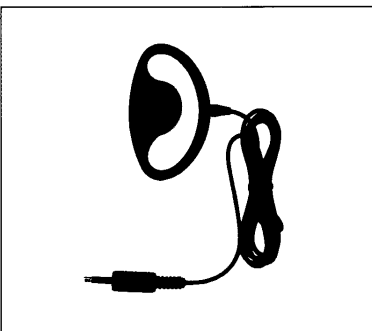

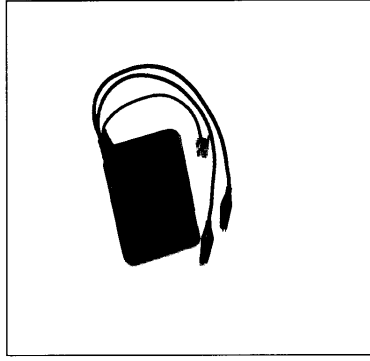

**Pro2000 Probe****Probe Features**

- Resistant to water damage
- Lightweight and easy to use
- Long battery life: over 100 hrs
- Non-conductive, durable tip specially mounted to prevent circuitry damage if dropped
- Simple to use High and Low volume control with automatic shut-off
- Shock resistant
- Separate battery compartment for easy replacement of 9 volt battery
- Captive screw on battery cover

**Ear Piece****Pro2000 Tone Generator****Tone Features**

- Generates tone on an unloaded cable length up to 6.2 miles (10 km)
- Over voltage protected in any mode (up to 110 VAC/260 VDC)
- Long battery life: over 200 hrs
- Separate battery compartment for easy replacement of 9 volt battery
- Gold plated contacts prevent corrosion build-up
- Shock resistant
- Easy 2 tone selection - Solid and alternating tones
- Blinking "ON" indication that's visible from a distance
- Solid strain relief on test leads
- Captive screw on battery cover
