

# Dual comparators

## BA10393 / BA10393F / BA10393N

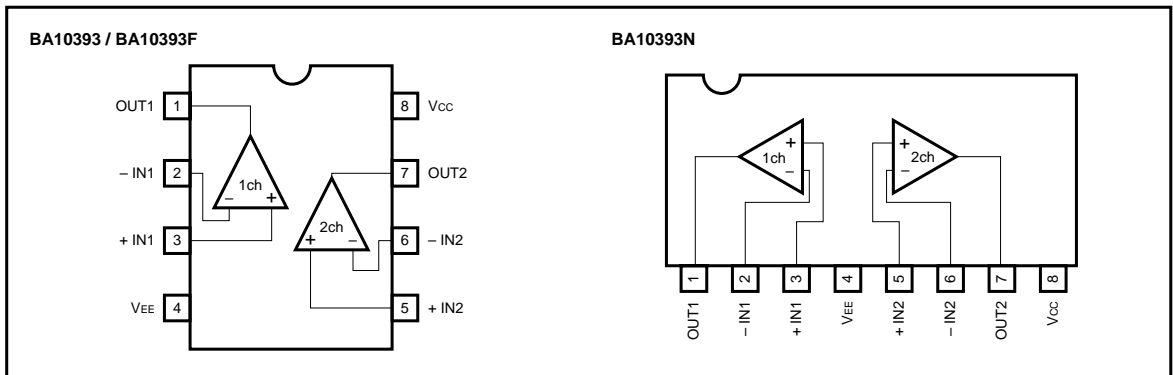

The BA10393, BA10393F, and BA10393N are dual comparators with open-collector output which allows wired OR connections.

The operating power supply voltage ranges from 2 to 36V for a single power supply and  $\pm 1$  to  $\pm 18$ V for a dual power supply. The packages are as follows: DIP 8-pin (BA10393), SOP 8-pin (BA10393F), and SIP 8-pin (BA10393N).

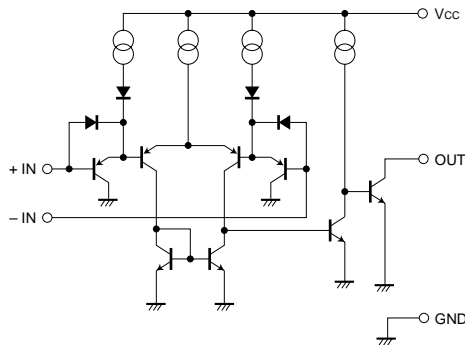

### ●Features

- 1) Wide operating voltage range.  
(Single power supply: 2 to 36V, dual power supply:  $\pm 1$  to  $\pm 18$ V)
- 2) Low current dissipation. (0.4mA typ. at  $V_{CC} = 5$ V)
- 3) Low input offset voltage. (25nA typ. at  $V_{CC} = 5$ V) and low input offset voltage. (typically  $\pm 1.0$ mV at  $V_{CC} = 5$ V)
- 4) Wide common-mode input voltage. (0 to  $V_{CC} - 1.5$ V)
- 5) Open collector output.
- 6) Compatible with 393 comparators from other manufacturers.

●Operation notes

(1) Handling unused circuits

If a circuit is not in use, we recommend connecting it as shown in Figure 7, so that its input is connected to the potential within the in-phase input voltage range ( $V_{ICM}$ ) and the output is left open.
