

**■ DESCRIPTION**

The AA8361 is the audio limiter for speaker protection. The limit level is adjustable by an external resistor. The IC is available in 10-pin MSOP (AA8361A) package.

■ FEATURES

- Wide Operating Voltage from +2.7V to +13.0V
- Variable Limit Level by external resistor from 0.2V to 1V
- Low Output Noise \cdot -90dBV max.
- Bipolar Technology
- Provided in MSOP-10 package

■ APPLICATIONS

- Audio
- PC
