

Medallion 6000 Series 1550 nm Externally-Modulated Transmitter

Applications

- High-Performance Supertrunking Links
- High Power Distribution Networks
- Redundant Ring Architectures
- FTTx Networks
- RFoG Applications
- SAT-IF Transport
- DWDM Node Splitting

Features

- Single or Dual Optical Outputs
- QAM Loading to 1003 MHz
- Dual Power Supplies, Redundant & Hot Swappable
- Front Panel RF Test Point
- SNMP Control Interface
- WEB GUI
- Vacuum Fluorescent Status Display
- OMI / RF Gain Adjustment
- AGC Select: CW, Video, Manual & (No AGC)
- Industry Leading Field Adjustable SBS Suppression
- Field Adjustable Electronic Dispersion Compensation (EDC)

The L-Type/D-Type/S-Type/F-Type/N-Type Medallion 6000 Series

The Medallion 6000 series is a family of state-of-the-art high-performance 1550 nm externally-modulated CATV fiber optic transmitters optimized for varying network applications. Packaged in convenient 1 RU housing, this line of optical transmitters couples high optical output powers, up to 11.0 dBm, with low optical linewidth resulting in unmatched performance. The optical modulator, combined with proprietary pre-distortion circuitry, provides superior CTB and CSO performance with SBS suppression levels of greater than 21 dBm. Advanced features such as built-in field adjustable SBS control and electronic dispersion compensation allow these transmitters to be quickly optimized in the field for any link or application without the need to procure specifically tuned transmitters. This affords the system designer a level of flexibility previously unknown in the CATV market place.

The L-Type series are designed as a high-performance solution for applications where the simultaneous transport of CATV and SAT-IF FM signals is required. The SAT-IF signals can be applied anywhere in the 950 to 2800 MHz band.

The D-Type series are designed as a low cost, high-performance solution for applications where the required fiber length is in the range of 20 to 50 kilometers. Advanced, high power, DFB laser technology allows these transmitters to be fielded without the use of EDFAs.

The S-Type series transmitters are designed to be the most versatile models within the Medallion 6000 series family. They can easily be configured to meet most HFC network solutions requiring link lengths in the range of 50 to 70 kilometers with one EDFA as well as links utilizing multiple EDFA's.

The F-Type series transmitters are intended for use in FTTx and RFoG architecture designs requiring high-quality transmission over varying transmission lengths and EDFA output powers. These transmitters successfully support very high optical launch powers while controlling the detrimental effects of Stimulated Brillouin Scattering (SBS), group velocity dispersion (GVD), and self phase modulation (SPM).

The N-Type series transmitters are intended for use in node-splitting architecture designs requiring cost effective DWDM transmission over medium length fiber distances.

Medallion 6000 Series 1550 nm Externally-Modulated Transmitter

Composite Triple Beat	CTB (dBc)	-62	-62	Max. @ +25°C
Composite Triple Beat	CTB (dBc)	-61	-61	Max. @ 0°C to 50°C

Notes:

1. Unless stated otherwise all specifications apply over full temperature range with no digital loading.
2. Unless stated otherwise specifications apply for nominal RF input level as defined below, after a 30 minute stabilization period.
3. Specifications separated by a slash are port1 / port 2.
4. Units are tested per the Test / Link Configuration Table
5. Noise figure for the EDFA = 4.5 ~ 5.5 dB
6. Corning SMF-28 single mode fiber
7. Receiver responsivity is 0.95 mA/mW, Equivalent noise current is 7 pA/(Hz)^{1/2}
8. With 36 QPSK modulated SAT-IF signals between 950 ~ 2800 MHz. 27 MHz IF bandwidth

Outline Drawing (Dimensions in inches)

Laser Safety Information

This product meets the applicable requirements of 21 CFR 1010 & 1040 and is classified as a Class 1M laser product. During use as intended, the laser energy is fully contained within the fiber network such that there is no accessible laser radiation. This product has been issued accession number 0820466-001.

Medallion 6000 Series 1550 nm Externally-Modulated Transmitter

Model Number Information (note 3)

Logo & Customer Specific	Link type	Pout (dBm min) ^{Note 1}	Loading Type	Optics	RF	Wavelength (nm)	Power Supply
0 – EMCORE Logo	D – 40 km	0 – for D, and F-Types	1 – NTSC (80-ch)	1 – SC/APC, Rear	1 – RF IN Rear, TP Front	00 – 1555+/- 5.0nm	1 – AC primary, no secondary
