

ENC499

Electrode Notching and Cutting Machine

MAIN FEATURES

- Electrode unwinding from reel.
- Electrode edge positioning control unit.
- Electrode dust collector.
- Anti-vibration machine base feet.
- Machine vibration and noise absorbing panel.
- Large color display for HMI.
- Movable HMI panel.
- Ethernet connection for remote control of the machine.

OPTIONAL

- Vision system for electrode notching pitch and height inline inspection.
- Manual splicing & die blanking station.

GENERAL INFORMATION

Machine performance: max. 120 notch cycles/min.
Machine set-up time: 30 minutes (approx.)
