# 1. SAFETY INFORMATION

## CAUTION

This service manual is intended for qualified service technicians; it is not meant for the casual do-it-yourselfer. Qualified technicians have the necessary test equipment and tools, and have been trained to properly and safely repair complex products such as those covered by this manual.

Improperly performed repairs can adversely affect the safety and reliability of the product and may void the warranty. If you are not qualified to perform the repair of this product properly and safely; you should not risk trying to do so and refer the repair to a qualified service technician.

## WARNING

Lead in solder used in this product is listed by the California Health and Welfare agency as a known reproductive toxicant which may cause birth defects or other reproductive harm (California Health & Safety Code, Section 25249.5). When servicing or handling circuit boards and other components which contain lead in solder, avoid unprotected skin contact with the solder. Also, when soldering do not inhale any smoke or fumes produced.

NOTE :

- Symbol indicates a resistor. No differentiation is made between chip resistors and discrete resistors.
- Symbol indicates a capacitor. No differentiation is made between chip capacitors and discrete capacitors.

The  $\Delta$  mark found on some component parts indicates the importance of the safety factor of the part. Therefore, when replacing, be sure to use parts of identical designation.

Decimal points for resistor and capacitor fixed values are expressed as:  
 2.2-2R2  
 0.022-R022

**6. ADJUSTMENT**

There is no information to be shown in this chapter.

# 7. GENERAL INFORMATION

## 7.1 IC

PA2027A

### 7.2 DISASSEMBLY

#### ● Removing the Case and the Panel Units

1. Remove eight screws A and nine screws B.
2. Remove Case and Panel Units.

Fig.7

#### ● Removing the the Amp Unit

Some silicone glue has been applied between the Heat Sink and the Sub Heat Sink. therefore, to remove the Amp Unit from the Heat Sink.

1. Remove ten screws C.
4. Use 2 pcs. of screw C and insert them into the two holes marked with an arrow.
5. Alternately tighten them little by little until the Sub Heat Sink(Sub) separates from the Heat Sink.

Fig. 8

### 7.3 BLOCK DIAGRAM

Fig. 8

## 8. OPERATIONS AND SPECIFICATIONS

### 8.1 SPECIFICATIONS

Power source .....	14.4 V DC (10.8 — 15.1 V allowable)
Grounding system .....	Negative type
Current consumption .....	15.2 A (at continuous power, 4 Ω)
Average current drawn* .....	4.6 A (4 Ω for two channels) 8.6 A (4 Ω for one channel)
Fuse .....	25 A
Dimensions .....	255 (W) × 61 (H) × 230 (D) mm [10 (W) × 2-3/8 (H) × 9 (D) in.]
Weight .....	3.5 kg (7.7 lbs.) (Leads for wiring not included)
Maximum power output .....	100 W × 2 / 300 W × 1 (EIAJ)
Continuous power output .....	50 W × 2 (at 14.4V, 4 Ω, 20 — 20,000 Hz, 0.08% THD) 150 W × 1 (at 14.4V, 4 Ω, 20 — 20,000 Hz, 0.8% THD) 75 W × 2 (at 14.4V, 2 Ω, 20 — 20,000 Hz, 0.8% THD)
Load impedance .....	4 Ω (1 — 8 Ω allowable) (Bridge connection: 2 — 8 Ω allowable)
Frequency response .....	10 — 50,000 Hz (+0 dB, -1 dB)
Signal-to-noise ratio .....	105 dB (IHF-A network)
Distortion .....	0.005% (10 W, 1 kHz)
Separation .....	70 dB (1 kHz)
Low pass filter .....	Cut off frequency: 50 — 120 Hz Cut off slope: -12 dB/oct
High pass filter .....	Cut off frequency: 50 — 120 Hz Cut off slope: -12 dB/oct
Bass boost .....	Frequency: 40 — 120 Hz Gain: 0 — 12 dB
Input level / impedance .....	RCA: 0.4 — 4.0 V/22 kΩ Speaker: 1.6 — 16 V/78 kΩ

**Note:**

- Specifications and the design are subject to possible modification without notice due to improvements.

**\*Average current drawn**

- The average current drawn is nearly the maximum current drawn by this unit when an audio signal is input. Use this value when working out total current drawn by multiple power amplifiers.

## 8.2 OPERATIONS

### Gain Control

If the sound level is too low, even when the volume of the car stereo used along with this power amplifier is turned up, turn gain control on the back of the power amplifier clockwise. If the sound distorts when the volume is turned up, turn the gain control counter-clockwise.

- Set the gain control to "NORMAL" when this amplifier is connected to a Pioneer car stereo with RCA output jacks. If the sound level is too low or distorts, adjust the gain control.

- If you hear much noise when using the speaker input terminals, turn the gain control clockwise.
- Adjust the gain control to the "MIN" side of "NORMAL" when this amplifier is connected to a Pioneer car stereo (High voltage output type).

### Power Indicator

The power indicator lights when the power is switched on.

### Cut Off Frequency Control

If the LPF/HPF select switch is set to LPF or HPF, you can select a cut off frequency from 50 to 120 Hz.

### Bass Boost Level Control

Bass boost level control can boost the level around the frequency selected by the bass boost frequency control from 0 to 12 dB.

### Bass Boost Frequency Control

You can select a bass boost frequency from 40 to 120 Hz with the bass boost control.

- Bass Boost Level Control and Bass Boost Frequency Control can be adjusted only when the LPF/HPF select switch is set to a position other than HPF.

### LPF (Low-Pass Filter)/HPF (High-Pass Filter) Select Switch

Set the LPF/HPF select switch as follows according to the type of speaker that is connected to the speaker output connector and the car stereo system:

LPF/HPF Select Switch	Audio frequency range to be output	Speaker Type	Remarks
LPF (left)	* — 50 to 120 Hz	Sub-woofer	Connect a sub-woofer.
OFF (center)	Full range	Full range	
HPF (right)	* 50 to 120 Hz —	Full range	Use if you want to cut the very-low-frequency range* because it is not necessary for the speakers you are using.

\* See the "Cut Off Frequency Control" section.
