Circuit Examples

The POSISTOR® has the following advantages over Bimetal devices.

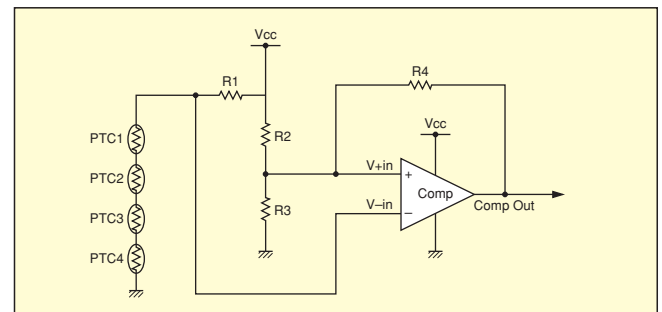

1. Noise free
2. No contact problems
3. Low price

The POSISTOR® has the following additional advantages over Zener Diodes.

1. Reduced numbers of parts used in circuits
2. Reduced process costs of mounting parts on PCBs
3. Reduces occupied space, helping high density PCB mounting

	Total	11	Total	4

More than two pieces of POSISTOR® can cover multi hot spots working with a comparator. Fig. shows basic circuit idea to connect multiple POSISTOR® in series. When One POSISTOR® detects overheat at least, a comparator can work by the sharp temperature-resistance characteristic. It easily allows changing a number of POSISTOR® or sensing temperature in the same basic circuit design.
