

DATA SHEET

# Surface Mount Schottky Quad Mixer Diodes

## Features

- Tight parameter distribution
- Available as ring quads, crossover quads, bridge quads and octoquads
- 100% DC tested
- Designed for high-volume commercial applications
- Available in tape and reel packaging
- Available lead (Pb)-free and RoHS-compliant

## Description

Skyworks offers a series of low-cost devices in a SOT-143 package. This series includes low, medium and high barrier junctions as ring quads, crossover quads and bridge quads. Octoquad rings are also offered for high dynamic range applications. These devices are constructed utilizing Skyworks monolithic chip technology, assuring uniformity of electrical characteristics for each junction. The low capacitance of Skyworks ring and crossover quads is optimal for double balanced mixer applications covering wireless frequencies into C-band. The bridge quads are designed for modulators and frequency multiplier applications. These diodes are 100% DC tested and deliver tight parameter distribution, minimizing performance variability. They compliment Skyworks product line of Schottky singles and pairs available in SC-70, SC-79, SOD-323, SOT-23 and SOT-143 packages. Available in tape and reel for pick-and-place manufacturing.

**NEW** Skyworks offers lead (Pb)-free, RoHS (Restriction of Hazardous Substances)-compliant packaging.

## Absolute Maximum Ratings

Characteristic	Value
Reverse voltage ( $V_R$ )	Rated $V_B$
Forward current - steady state ( $I_F$ )	50 mA
Power dissipation ( $P_D$ )	75 mW
Storage temperature ( $T_{ST}$ )	-65 °C to +150 °C
Operating temperature ( $T_{OP}$ )	-65 °C to +150 °C
Junction temperature ( $T_J$ )	150 °C
Soldering temperature	260 °C for 5 seconds
ESD human body model	Class 1B

Performance is guaranteed only under the conditions listed in the specifications table and is not guaranteed under the full range(s) described by the Absolute Maximum specifications. Exceeding any of the absolute maximum/minimum specifications may result in permanent damage to the device and will void the warranty.

**CAUTION:** Although this device is designed to be as robust as possible, ESD (Electrostatic Discharge) can damage this device. This device must be protected at all times from ESD. Static charges may easily produce potentials of several kilovolts on the human body or equipment, which can discharge without detection. Industry-standard ESD precautions must be employed at all times.

## Electrical Specifications at 25 °C (Per Junction)

Barrier	$V_B$ @ 10 $\mu$ A (V) Min.	$C_J$ @ 0 V 1 MHz (pF)	$V_F$ @ 1 mA (mV)	$\Delta V_F$ @ 1 mA (mV) Max.	$R_T^{(1)}$ @ 10 mA ( $\Omega$ ) Max.
