

Bias Resistor Transistor

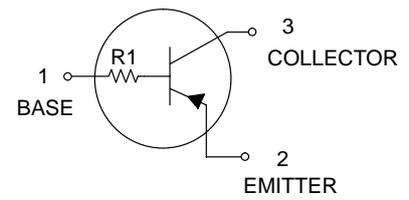

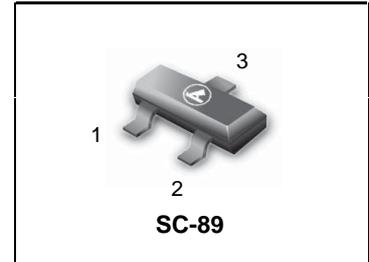

PNP Silicon Surface Mount Transistor with Monolithic Bias Resistor Network

LDTA124TET1G

- **Applications**
Inverter, Interface, Driver

- **Features**
 - 1) Built-in bias resistors enable the configuration of an inverter circuit without connecting external input resistors (see equivalent circuit).
 - 2) The bias resistors consist of thin-film resistors with complete isolation to allow positive biasing of the input. They also have the advantage of almost completely eliminating parasitic effects.
 - 3) Only the on/off conditions need to be set for operation, making the device design easy.

- We declare that the material of product compliance with RoHS requirements.
