

56W 120V AC 204mm Square LED Module

AC LED Technology by Lynk Labs
Compatible with Phase-cut Dimmers, Warm Dimming Option
5 yr. Warranty

Specifications

Drive Voltage:	120Vac (100-132V Min-Max)
AC Current:	460 mA @25°C typical; 520 mA max
Power Dissipation:	56W typical; 65W max
Power Factor:	>0.97
THD:	<20%
Life:	50,000 Hrs, if used as specified
Luminous Flux:	3838 lm @3000K
Luminous Efficacy:	70 LPW ±10% @3000K
Viewing Angle:	120 deg
Operating Temp:	-25°C to +100°C
Storage Temp:	-40°C to +100°C
Soldering Temp:	370°C

Line voltage AC LED modules are easy to use, offering direct connectivity and effectively replacing traditional lamp technologies. Patented AC LED technology eliminates the need for an AC-DC driver.

Features

- Direct 120V line connection
- Compatible with most existing leading edge or trailing edge phase cut AC Dimmers
- High Efficiency
- Significant Energy Savings
- Reliable, fast and easy
- Durable Light Source
- Long Operating Life

Applications

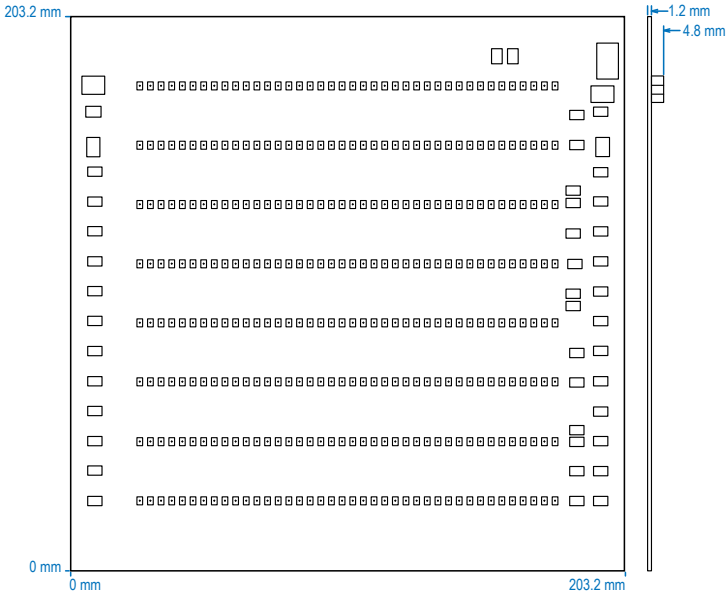

- Highbay/Midbay
- Indoor/Outdoor General Line-voltage Illumination
- Ideal for parking lot, commercial, hospitality

Warm Dimming

Warm-Dimming models change the CCT with the dimming level, mimicking how an incandescent lamp appears to warm as the light level reduces. Perfect for hospitality and residential applications. Warms to 2200K.

Packaging

- LED Modules will be packaged in trays for primary protection.
- According to the total delivery amount, cardboard boxes will be used to protect the trays of LED Modules from mechanical shocks during transportation.
- The boxes are not water resistant and therefore must be kept away from water and moisture.

Reliability and Average Lumen Maintenance

Before releasing new products the manufacturer puts a representative product sample set through an entire suite of qualification tests, including the most stressful test for high power LEDs, the Wet High-Temperature Operating Life (WHTOL) test at 85°C/85%RH for 1000 hours at the specified operating current.

LED lifetime has been extrapolated based on the accumulated operating and accelerated aging data. Based on this data, the manufacturer projects that the LED products will deliver, on average, 70% lumen maintenance at 50,000 hours of operation at the specified operating current, provided that the case temperature is maintained at or below 80°C.
